Dear blog readers,

I've decided a diverse portfolio of fast flux name servers which basically act as a bulletproof

botnet C &C communication technique allowing the cybercriminals

behind the campaigns to

increase the average time for which their campaigns remain online.

In this post I'll provide actionable intelligence on the infrastructure behind a network of fast-flux

servers circa 2008 and discuss in-depth the tactics technique and procedures of the cybercrim-

inals behind these campaigns.

Sample fast-flux name servers involved in various campaigns circa 2008:

16.10.31 U.S Justice Department Releases "Legal Considerations when Gathering

Online Cyber Threat Intelligence" - Where's the Meat? (2020-12-13 15:59)

[1]

Surprise, surprise! The U.S DoJ has recently released a detailed "[2]Legal Considerations when

Gathering Online Cyber Threat Intelligence" guide which aims to educate security practitioners

on their way to gather threat intelligence and how to actually utilize the information to further

assist U.S Law Enforcement on its way to track down and prosecute the cybercriminals behind

these campaigns.

What the paper basically explains is the basics of passive OSINT

however it also includes a

detailed explanation on the actual use of cybercrime-friendly forums to gather threat intelli-

gence potentially signaling a "bad taste" trend further enticing users into joining these forum

communities potentially contributing to the overall increase of cybercrime internationally.

What should be taken clearly into consideration in terms of possible recommendations for this

research guide is that it doesn’t take to become a cybercriminal in order to catch a cybercrim-

inal and that on the majority of occasions the majority of information required to launch an

investigation into the whereabouts of high-profile cybercriminals is actually publicly accessi-

ble.

Users who are interested in joining the world of threat intelligence gathering should consider

going through my "[3]The Threat Intelligence Market Segment - A Complete Mockery and IP

Theft Compromise - An Open Letter to the U.S Intelligence Community" post including to ac-

tually join forces in my currently ongoing Law Enforcement and OSINT operation called "Uncle

George" where the idea is to obtain a direct download copy of my "[4]Cybercrime Forum Data

Set for 2019" and participate in the actual enrichment and analysis of the forum communities

for the purpose of assisting U.S Law Enforcement on its way to track down and prosecute the

cybercriminals behind these forum communities.

16.10.32 Historical OSINT - International Institute For Counter-Terrorism Serving

Malware - An Analysis (2020-12-13 15:59)

The International Institute For Counter-Terrorism is known to have served malicious software

to its targeted user base back in 2013.

In this post I'll provide actionable intelligence behind the campaign and discuss in-depth the

tactics technique and procedures of the cybercriminals behind it.

Sample malicious software client-side exploits serving chain:

hxxp://ict.org.il/js/1.html

Sample malicious MD5 known to have participated in the campaign:

MD5: e29c9a81c204aeb901a7287978cf58db

Once executed the sample drops additional MD5s on the affected host:

MD5: d2354e9ce69985c1f55dbad2837099b8

MD5: 4e1e2b9cd6b5bca2b1b935ddc97f2d7a

Once executed the sample phones back to the following C &C server domain:

hxxp://interfacet.oicp.net - 65.19.141.203

Related malicious domains known to have phoned back to the same C &C server IP

16.10.33 Historical OSINT - A Compilation of Publicly Accessible Web Shells - An

Analysis (2020-12-13 16:00)

[1]

12623

In this post I'll provide actionable intelligence on some of the currently active publicly accessi-

ble IPs which are known to have been hosting publicly accessible web shells for the purpose

of empowering the cybercriminals behind the campaigns to establish a direct connection with

the server in question potentially resulting in a direct compromise of

the server which could

further assist in the ongoing monetization of the access for the purpose of hosting blackhat

SEO content including malicious software on the compromised server.

Sample known IPs known to have hosted publicly accessible Web shells circa 2013:

16.10.34 How I Got Robbed and Beaten and Illegally Arrested by a Local Troyan Gang

in Bulgaria? (2020-12-14 12:44)

[1]

UPDATE: Catch up in terms of my [2]current situation in Bulgaria.

UPDATE: Check out the [3]original complaint here.

Zdraweite,

Kazvam se Dancho Danchev s mobilen telefon +359876893890 ot grad Troyan jivusht na pos-

toqnen adres v grad Troyan i reshih da podam signal otnoso prestupna i korupcionna deinost ot

strana na slujiteli na RPU Troyan i bolnica Troyan vkluchitelno i psihiatria klinika Lovech otnosno

neizqsnen opit za otvlichane sprqmo men bez nikakvo znanie ot nikoi i bez nikakvo pravoraz-

davane sprqmo situaciqta i sushto taka za izqsnqvane na grajdansko polojenie i lishavane ot

prava i intelectualna sobstvenost i zaguba na pari v razmer na 100,000 leva pod vliqnie-to na

korupcionni praktiki i domashno nasilie ot strana na moi roditeli i upoivashti veshtestva bez

znanieto na durjavata i bez znanieto na nikoi s cel da buda privikat za izqsnqvane na obstoq-

telstva i da razber-a dali ne sum tursen za izqsnqvane na takiva.

12629

[redacted]

[redacted] от 2010 г. [redacted]

ЕПИКРИЗА

На Данчо [redacted] Данчев, на 27 години

[redacted]

[redacted]

Повод за настоящата хоспитализация: Постъпва за пръв път в психиатричен стационар и до настоящия момент не е ползва специализирана психиатрична помощ. Доведен с Преписка на РУ на МВР - Троян.

По данни от родителите промяната в поведението датира от началото на месец юли, когато заминал да живее сам на квартира в София. През първия месец поддържал ежедневна връзка с тях по телефона, но след това спрял да се обажда. На позвънявания от тяхна страна не отговарял или изключвал телефоните си. Това ги притеснило и те започнали да го издирват активно. Получили писмо от хазаина, че до 15.09.10г. трябва да освободят квартирата, а така също и няколко обаждания за неплатени лизингови вноски за закупен от сина им лаптоп. На посочената дата те отишли в София, където намерили сина си да спи в квартирата. Отказвал да говори с тях, бил груб и хладен. Събрали му багажа за да се върнат в Троян, той ги оставил пред квартирата под предлог, че е зает и заминал някъде с такси. След завръщането в Троян отказвал да контактува с родителите и с други познати. Затварял се по цял в стаята си, отказвал да се храни заедно с тях. Напускал дома си без да дава обяснения къде ходи и кога ще се върне. Промяната в поведението му била констатирана и от съседи и приятели на семейството, които Данчо подминавал като напълно непознати. При отправени забележки от страна на Майката „започвал да ягледа лошо". Навсякъде ходел с преносимия компютър. Гледал телевизия от около метър разстояние, заключвал и по няколко пъти проверявал входната врата дали е заключена. Непосредствено преди намесата на полицията започнал да говори несвързано, смесвал спомени от детството с наскоро случили се неща, употребявал много компютърни термини до степен на неразбираемост.

V godinat-a 2010 nepoznato lice nahluva v kushtat-a mi i mi vadi documenti s drugo nepoznato

lice koeto go chaka na stulbite v kushti i izqvqva jelanie da se vidim i da razgovarqme pri koeto

az se skrivam. Na sledvashtiq den 3-ma slujiteli ot RPU Troyan s bashta mi nahluvat v moqta

kushta i me izdurpvat ot staqta i mi pokazvam kseroks kopie ot lichnata mi kart-a koeto az ne

sum predostavql i nasilstveno me izdurpvat ot u nas i me otvejdat s kola v nepoznat-a posoka

bez da mi e davano obqsnenie za zadurjaneto mi s vkluchitelno medicinsk-a sestra v moqt-a

kushta koqto mi predlag-a da piq hapche kato gorivot-o za prevoza na kolat-a se prepisva na

firmat-a v koqto raboti moqto maika firma Lesoplast.

Sushtiq den sum nastanen v psihiatria Lovech pri koeto sum kanen da se podpisha i posesh-

tavam chovek koito ne poznavam koito mi obrabotva documenti-te sled koeto bez da mi bude

davano obqsnenie sum zaveden i zakluchen v karcer za period ot nqkolko mesec-a bez da mi

bude davano obqsnenie za zadurjaneto mi.

Sushtiq den v psihiatriq-ta v karcer-a pri men dovejdat lice koeto poznavam izvestno kato

12630

Kamen Tzura i go vkarvat pri men v karcer-a kato prekarvam noshtan leglo. Liceto e dovedeno

ot sused policai koito poznavam i se kazva Dilqn Minkov.

- Tinka Antimova - turse me da davam kruv bez da me poznava

- lekarstvoto mi struv-a 600 leva a to e mostra i struva 20 leva

- predlaga mi da mi biqt injekcii kogato piq hapche

- Ganev - zashto davam pari na roditelite si

Pri poslednoto mi poseshtenie v RPU Troyan za da se oplacha ot eventualno otrqvane i ot moite

roditeli mi se kazva che ne trqbva da jiveq u nas.

16.10.35 Exposing the Solarwinds Malware Campaign - An OSINT Analysis

(2020-12-27 21:06)

It has recently became evident that the Solarwinds enterprise which is basically an IT

monitoring and management tool suffered a major backdoor attack where malicious

attackers managed to obtain access to and actually backdoor a decent portion of Solarwinds

infrastructure potentially compromising key network assets and compromising the integrity

confidentiality and availability of the targeted infrastructure to a variety of malicious software

attacks.

In this post I'll discuss in-depth the attack and offer an in-depth technical and OSINT analysis

on the campaign including to actually provide TTPs (Tactics Techniques and Procedures) of the

cybercriminals behind it.

Malicious malicious files known to have participated in the campaign:

SolarWinds.Orion.Core.BusinessLayer.dll; netsetupsvc.dll

Sample malicious MD5s known to have participated in the campaign:

b91ce2fa41029f6955bff20079468448

17.1.1 Dancho Danchev's Security Research for ZDNet's Zero Day Blog - Official Mul-

tiple E-Book Formats Compilation (2021-01-01 15:28)

[1]

12707

Dear blog readers,

I've decided to let everyone know that I just released an official security research compilation

for all the blog posts that I did for ZDNet's Zero Day blog circa 2008-2012 with the idea to

make it easier for everyone to catch up in terms of what I've been up to in terms of research

throughout that period of time in multiple E-book format full offline copies.

Grab a copy from [2]here.

Stay tuned!

17.1.2 Dancho Danchev's Security Research for Webroot Inc - Official Multiple E-

Book Formats Compilation (2021-01-01 15:28)

Dear blog readers,

Do you remember my work for Webroot Inc. which was my ex-employer 2012-2014? Great

news. I've decided to make an official offline multiple E-book formats official security research

compilation of all the blog [1]posts that I did for Webroot Inc. throughout 2012-2014 with the

idea to make it easier for my readers to catch up in terms of what I've been up to in terms of

research throughout 2012-2014.

Grab a copy from [2]here.

17.1.3 Exposing the Pay Per Install Underground Business Model – Historical OSINT

- An Analysis - 2008 (2021-01-06 22:49)

What are some of the primary scareware and adware distributors circa 2008? Which were the

most profitable pay-pay-install and drive-by-download affiliate-network based revenue-sharing

scheme malicious and fraudulent scareware and adware pushing providers circa 2008? Who

was providing them with the necessary infrastructure to help them stay online and earn

fraudulent profit in the processes of pushing fake security software also known as scareware

including adware to hundreds of thousands of unsuspecting users online? Keep reading.

In this exclusive analysis I'll provide actionable intelligence on some of the major rogue

and fraudulent pay-per-install and drive-by-download scareware and adware pushing affiliate-

network based type of rogue providers circa 2008 and discuss in-depth the tactics techniques

and procedures of the cybercriminals behind these affiliate-networks including actionable

intelligence on the infrastructure behind these campaigns.

Sample Key Pay-Per-Install and Drive-by-Download Affiliate-Networks that I'll expose in this

analysis circa 2008 include:

• LuxeCash

• LoudMo

• Adware Dollars

• GoldenCashWorld

• CodecMoney

• Earnings4you

• EXE Revenue

• Go-Go-Cash

• InstallConverter

• InstallerCash

• Junior VIP

• Oxocash

• Snap Installs

• Spicy Codec

- The Installs
- Traf Cash
- Vomba Cash
- Wave Revenue
- Ya Bucks
- Yazzle
- Zango Cash
- 3XL Parnership
- Cash Boom
- Cash Codec
- Cash Wrestler
- Buckware
- Bakasoftware
- Cash Panic
- Dogma Software
- K2Cash
- Traffic Converter
- VipSoft Cash
- Dailybucks
- EU Pays
- Golden Cash
- Profit Cash
- Ruler Cash
- Sex Profit

• VIP Convert

• Stimul Cash

If you have a problem or

Members Area / Installation Files

In order for us to be able to track the installations you perform, you need to use an installation file which is tagged with your Affiliate ID (and, optionally, Tracking ID if you want to track installs for each of your sites individually). The tagging of the installation package is done automatically, so in order to get the installation files, you just need to specify Tracking ID (optional) and request them, by clicking the Request Install Files button below.

The installation files are available as either a .exe or a .dll.

To install from DLL execute the following command:
rundll32.exe <name_of_dll>.dll,Start

The status of your requests can be seen below. If you have problems with your Installation Files downloading, please contact your affiliate representative.

pay-per-install.org

Date requested	Affiliate ID	Tracking ID	Detailed
2008-04-11 19:28:27	152459		Download installation files

3XL
partnership
Лучшим партнерам — лучший отдых!
— Условия конкурса
топ 20
Конкурс длится 20 недель (С 16.06.2008 по 02.11.2008) и состоит из нескольких этапов:
- недельный топ
- месячный топ
- общий топ
Недельный топ
Топ составляется из вебмастеров, которые заработали максимальное количество денег за прошедшую неделю (с 00.00ч понедельника по 24.00 воскресенья).
Один из 20 вебмастеров, вошедших в недельный топ, получает бонусные $150 к выплате. Победитель определяется случайным образом. На 3XLcash и 3XLsoftware топы разделены, поэтому $150 получит один из вебмастеров недельного топа на 3XLcash и один из вебмастеров на 3XLsoftware.
Месячный топ

О КОМПАНИИ
НАШИ ПРОГРАММЫ
КОНТАКТЫ
КОНКУРС
3XL
partnership
Кто мы?
Кроме того, что мы уже не первый год делаем партнерские программы для ВАС, мы такие же вебмастера как и Вы. Нас волнуют те же вопросы. Как получить максимальную доходность со своего трафа? Как получить стабильный доход? Мы знаем что для Вас важна постоянная поддержка продукта, мы прекрасно понимаем что Вы хотите получать деньги стабильно.
Что мы предлагаем?
В основе нашей партнерки лежат старые темы (кодеки и софт, в ближайшем будущем платники и другие интересные предложения), которые мы сумели скрестить в общих промо и получить отличные результаты от такого симбиоза! То есть за счет того, что серферу на разных этапах предлагаются различные решения, это приводит к продаже или установке с большей вероятностью. Соответственно выхлоп с одного и того
Почему 3XL?
Мы не обещаем Вам мегаконверт и супервыхлоп, но наверняка сможем дать Вам больше, чем Вы получаете сейчас. Кроме стандартных промо, мы точно предложим Вам новые оригинальные решения для продвижения наших продуктов, которые позволят получить хороший выхлоп с любого трафа!
Так же мы гарантируем Вам круглосуточную поддержку! Мы даем обязательство, что оплаты у нас будут проходить строго в дни, обозначенные в правилах! Чтобы не быть голословными мы даже готовы нести финансовые потери со своей стороны в случаях, когда не сможем во время ответить на Ваши вопросы!
В случае, если Ваш тикет висит без ответа более часа, то в ближайшей выплате Вы получите 50$ за наш промах. Если вдруг мы задержали выплаты, мы готовы отдать Вам еще 1% к вашей выплате за каждый день просрочки.
Стабильное сотрудничество!

cash4toolbar.com

our program

Cash 4 Toolbar is a one of a kind affiliate program! There is no traffic that we cannot convert on. With over nine years of combined experience in the internet business we have built a program that is virtually one of the easiest ways to make money with. You must have heard this sentence many times before, but we tell you why it is true with us. The way our program works is that the surfer will see an active-x prompt and if they click yes it will install a toolbar on their computer and you get paid! It's that simple. At the same time you get recurring money and traffic back as well. Many pay-per-install programs hijack affiliate codes which is the only way they can pay you, but with us we assure you no hijacking of affiliate codes will be done! We have worked on our program for many months to make sure we can afford the rates we pay and if you don't believe us click here to install the toolbar and check your hosts file or any file whenever you want and you will see nothing of that sort! We make our money with the toolbar, users start page, as well as contextual pops.

With our program you get the following:

PER INSTALL
We will pay you $0.15 per install for United States, United Kingdom, and Canada as well as $0.01 per install for all other countries.

TOOLBAR LINKS
When the user installs the toolbar it will carry your sponsor codes 25% of the time so the more installs you get the more money you make with the toolbar itself in the long run.

TRAFFIC BACK
When the surfer installs the toolbar they will also have a new bookmark in their favorites which will go to a website of your choice and the name as well. Over a period of time you will find yourself getting a constant flow of traffic to help you grow your website with new visitors all the time!

REFERRING WEBMASTERS
We will pay you 10% of all commission made by webmasters you refer to Cash 4 Toolbar.

Our goal is clear and simple! We want you to make money from your traffic in a way you would never have thought of. Signup...get the code....put it on your website...start making money within seconds!

Don't believe us? click here to signup and we will prove it to you!

Дорогой Партнер!
Спасибо за то, что был с нами в 2008 году.
Разреши от чистого сердца и всей команды ГлавМеда поздравить тебя с Новым 2009 Годом!
Как бы ни сгущались краски в мире, мы уверены, что Бабло и Труд - все перетрут.
Надеемся, что наши небольшие сувениры поднимут тебе настроение и станут символо
новых возможностей в Новом 2009 году!
Ура!
Бабло - ДА!
Кризис - *УЙ!

12773

Приятно ощущать себя
ТОР Вебмастером ?
Вся команда ГлавМеда поздравляет тебя
с этим достижением.
От души желаем повторить это в 2009 году!
Совет Года от ГлавМед: Не быкуй! :)
Не быкуй!

NichePass v. 2!
We are proud to announce the release of NichePass v. 2! Please take a look at our renewed portal www.nichepass.com. It's more than a better looking design and enhanced interface for members, it also possesses a completely new engine with more features such as a streaming flash video server, more previews, high resolution photos, more payment options, new tours and joining pages! And Nichepass converts much better now--the ratio is great! Feel free to test it out on your traffic!
01-07-2007

Rank Sponsors

ZangoCash

★★★★★

ZangoCash is the oldest Pay Per Install business model company on the Internet these days. They were formely LoudCash and than in 2005 moved to ZangoCash. They are much more strict so no fraud webmasters get in their system. They also have to follow laws so they will stay on the market long time.
ZangoCash pays much more than other pay per install affiliate programs. Zango Cash again increased rates in Dec 2007 and now will pay you from $0.75 to $1.45 per USA installation, $0.40 to $0.75 for Canada, France, Germany, Italy, Netherlands, Spain, United Kingdom installs and $0.10 to $0.24 for these countries Australia, Austria, Belgium, Denmark, Finland, Iceland, Ireland, Mexico, New Zealand, Norway, Portugal, Singapore, Sweden, Switzerland installations. So you get paid every time someone installs from those countries.
Zango has great referral program with incredible rate of 20% so you will make 20% of your downline earnings forever.
There is many ways how to promote ZangoCash such as Syndication, DRM, Media Restrictor, Software bundle and others. You get alwayy paid by paypal, check or wire transfer.

LuxeCash

★★★★

START TODAY!

LuxeCash is new Pay Per Install company and is open only for serious webmasters with quality traffic. If you have products that are downloaded 1000 times per day than you can realy get rich in short time if you bundle their simple code with you product. The more quality installs you produce the better rates you get and more money you make. They dont want to loose their profit but also they want to keep you at their webmaster so they pay you as much as they can afford. You need

LuxeCash START TODAY!

****

LuxeCash is company which is open only for serious webmasters with quality traffic. If you have products that are downloaded 1000 times per day than you can realy get rich if you bundle their simple code with you product. You can earn more with them if you have quality installs and those installs make money. They dont want to loose their profit but also they want to keep you as their webmaster so they pay you as much as they can afford. You need to be in close contact with them through ICQ to get customised rates. I can not tell you how much you make because each website is getting different money for different content. Sign up and start making money with its unique pay per install program. Payments are sent on time and support is online most the time to help you. There are numerous payment methods: e-gold, epassporte, paypal, moneybookers, fethard, check, bank wire. Payments are send twice a month.

.our advantages
No shave
up to 70% commision
Biweekly payouts
Personal domains
Stable servers
No refunds and chargeback
.about us
> register right now
Are you a webmaster who wants to get the maximum profit from his sites? Do you have a lot of "garbage" traffic? We offer you a way to convert any traffic you have and get additional profit for the traffic which you couldn't convert anywhere else!
There are three easy steps to make to start earning with us:
> Register at our adware affiliate program;
> Grab your link in the member area;
> Start sending your traffic to your link;
>
As a rule 1000 unique IP's sent to our links will bring you up to $10 profit!
Don't forget about referrals earnings. Our affiliate program will pay you 5% of your referrals' earnings.
There is one more important thing about our program . you won't stop earning even when you stop sending traffic to us! Once installed our software will keep making you money for weeks.

(2021-01-13 14:41)

Dear blog readers,

I’ve decided to take the time and effort and say big thanks to everyone who’s been following my

research since December, 2005 and has been touching base to say "hi" or to offer operational

support or to share their "know-how" and opinion about the research that I’ve been publishing

on my personal blog.

I’ve recently posted a high-profile and recommended reading article at my Medium account

which you can check out [1]here. The article is basically a first-person account of my life and

experience as an ex-Bulgarian hacker today’s World’s leading expert in the field of cybercrime

12915

research and threat intelligence gathering which you might be interested in reading and actu-

ally sharing with your social network including friends and colleagues.

Stay tuned!

17.1.7 Dancho Danchev's Primary Contact Points - 2021 (2021-01-14 01:59)

[1]

Dear blog readers,

Welcome to 2021. I've decided to share my primary contact points for 2021 in a separate

post with the idea to allow everyone to add me as a contact or actually send me an instant

message or an email regarding possible inquiry about some of my research including possible

invite-only conference attendance or presentation proposal inquiry

including possible part-time

or full-time independent contractor based work and agreements.

Here are my primary contact points for 2021:

Primary email: dancho.danchev@hush.com

Email for sensitive projects: ddanchev@cryptogroup.net

Skype: dancho _danchev _

Silent Circle: ddanchev

Signal: +359 87 68 93890

WhatsApp: +359 87 68 93890

Threema: KY622AU5

12916

Including the following social media accounts - [2]Twitter, [3]LinkedIn, [4]Facebook including

[5]Medium.

You can also use the following public PGP key for my dancho.danchev@hush.com account in

case you're interested in approaching me for a possible participation in a sensitive or classified

project:

17.1.8 Dancho Danchev's Keynote at CyberCamp 2016 - "Exposing Koobface - The

World's Largest Botnet" - Recommended Watching! (2021-01-14 02:01)

Dear blog readers,

I wanted to take the time and effort and let everyone know that you can now watch my

keynote presentation from CyberCamp 2016 on the topic of "[1]Exposing Koobface - The

World's Largest Botnet" and actually get a bigger picture in terms of my research into the

workings of the [2]Koobface botnet where I was once the primary source of information on

the way it used to work and eventually contributed to its demise by publishing personally

identifiable information on one of its botnet masters potentially assisting U.S Law

Enforcement on its way to track down and prosecute the cybercriminals behind the campaign.

Stay tuned!

17.1.9 From "The Underground" With Love - A Compilation of Cybercrime Under-

ground Chatter Referencing My Research (2021-01-14 02:30)

Dear blog readers,

I've decided to make a quick compilation of underground chatter including references of my

research courtesy of high-profile cybercriminals internationally with the idea to raise awareness

on their existence and to provoke more researchers to dig even deeper on their way to track

down and prosecute the cybercriminals behind these campaigns.

Dancho Danchev is still missing

Author | Message

...but is alive, apparently.

I feel bad for the dude, sounds like he bit off more than he could chew.

Rumor is that he might be in the crazy house....

FBI?
Dancho missing?
Stuxnet?
thing about it

rumours are that he got paranoid/schizophrenic and is now on a mental hospital
what else could it be when u mix up a light equipment for a bugging device

Kreibe next?

What's his nickname by the way?

Jupdate:
mofi

Powered by Linux - SEO Company

someone should send him emails saying that the fbi is onto him, and will soon catch him. Make his schizophrenia even worst, and hopefully disappear again.

> **Quote:** zeusnas wrote:

Ivan Kaspersky kidnapped

Author	Message
NASAAFF FRESH FISH Joined: 23 Nov 2009 Posts: 551 Rep: 1885	Sulekh wrote: godlike wrote: We should kidnap the people who are behind abuse.ch .....Those guy's have screwed up my business a few times On maze was a thread about killing Roman. But hey...this goes a bit too far, its a cat and mouse game but from a technical point of view imho. going to far my ass. If he is helping authorities by putting people behind bars for 1+ years, he better be ready to get whacked. Fucking drug dealers kill people, and they only face 1-2 years (without the murder of course).

[NCR] LEVEL 1 Joined: 20 Feb 2010 Posts: 269 Rep: 1625 Location: ...skyline...	About five years ago zimbie had published a very interesting open-letter from his underground friends (est/FSB) doing vx-/vjr affairs. In that letter unknown guy ("cops", using ex/ex/brilliant level of rank) and Whale/2bit said KAV = rurkshit and this company doesn't deserve any respect, they are all stupid lame. Guys have asked a rhetorical question to themself, something like : "What should we do? Probably, collect some money for physical counter-strike....I have 10K for start and my niggaz will help us. Kasper, don't do that shit in newspapers where you are using unpolmetic, proof for fetched allegations through yellow horror stories which sounds like "Russia is a citadel of Cybercrime! We are your saviours" Anyway, I don't think that someone from blackhats has realized such kind of RL crime because kidnapping has serious consequences. Probably, if it's not a PR, this situation was due to really mad criminals (we can't exclude an internal battles between serious persons). kasper started his early career from KGB then founded company of the same name, he has connections in government and federal security service, so only mindless or big-handed criminals can force him to kidnapping. Think about the Wax...

C&C ARCHITECTURE

Compared with the complex C&C architecture of the Storm, WALEDAC, and DOWNAD botnets, the KOOBFACE C&C infrastructure is very basic. It only consisted of infected nodes and C&C domains that used HTTP as its communication protocol.

Figure 40. KOOBFACE C&C prior to July 19, 2009

Figure 41. Updated KOOBFACE C&C as of July 19, 2009

This simplistic C&C approach is, of course, very vulnerable to takedowns. After several KOOBFACE C&C takedown attempts initiated by Internet service providers (ISPs) and members of the security industry,[3] the KOOBFACE gang realized the need for a more robust C&C infrastructure. Thus, on July 19, 2009, the KOOBFACE writers implemented a new C&C architecture that involved the use of proxy nodes to provide redundancy and to improve the survivability of their C&C should another takedown be attempted.[4]

A few days after the new KOOBFACE C&C infrastructure was implemented, the botnet was seen inserting a message (see below) for one of the security researchers tracking the malware's domain activities.

17.2.3 Rogue "Malware Spreading Security Researchers" Launch Malicious Social

Engineering Campaign Against Legitimate Researchers - OSINT

Analysis

(2021-02-05 02:55)

Security researchers from Google have recently [1]spotted and properly analyzed a currently

circulation malicious software spreading social engineering driven malicious campaign that’s

actively interacting with legitimate researchers on social media and private channels for the

purpose of tricking them into testing a newly discovered zero day flaw which in reality drops

malware on the affected hosts and phones back to a C &C server potentially attempting to

compromise the researchers in question.

Sample screenshots of the campaign currently in circulation:

12933

Zhang Guo
I'm researching chrome RCE bugs.
And you?
14/12/20, 17:32
Ah, I haven't done much with chrome
14/12/20, 17:33
what do u research?
14/12/20, 17:35
I can't really go into too much detail I'm afraid
14/12/20, 17:36
why?
No problem.
Do u use other messenger?

Zhang Guo
@z0x55g
umm.
I found windows kernel 0day,a few days ago.
I'm going to exploit it.
But...
I' m
looking for someone to research together.
How about?
Fri 10:18 AM
I am not worthy
But I appreciate you thinking of me
I'm not at your level
1
Fri 10:18 AM
umm, what do you research?
Fri 10:20 AM

1:36 AM
decrypt successful? 1:36 AM
yes 1:37 AM
you can build and test in your vm 1:38 AM
ok, 1:38 AM
no build errors? 1:39 AM
please wait 1:40 AM
it only work for x64? 1:41 AM
yeah it's for x64 version 1:42 AM
it was patched in november 2020 1:43 AM
no errors? 1:43 AM
it will pop up cmd with system 1:45 AM
yes, I get the shell 1:47 AM
congrats 1:47 AM
you are so smart! 1:47 AM
I will study this poc carefully 1:49 AM

17.2.4 FBI Shuts Down Radical Propaganda Online Web Sites - An OSINT Analysis

(2021-02-05 02:56)

[1]

The U.S Department of Justice in direct cooperation with the FBI has recently [2]shut down

a network of propaganda Web sites courtesy of what appears to be the Liberty Front Press

network.

In this post I'll provide actionable intelligence on the infrastructure behind the campaign and

discuss in-depth the tactics techniques and procedures of the individuals behind it.

17.2.5 Profiling a Currently Active Portfolio of High-Profile Cybercriminal Jab-

ber and XMPP Accounts Including Email Address Accounts - Part Three

(2021-02-16 13:44)

Dear blog readers,

It's been a while since I've last posted a quality update following the announcement of my cur-

rently active Law Enforcement and OSINT operation called "[1]Uncle George". Ever since I've

originally announced it I've distributed the data set to a variety of researchers and vendors on

their way to assist in possible enrichment and data mining of the data set potentially assisting

in the disrupting the rogue cybercriminal operations launched on these cybercrime friendly

forum communities potentially assisting U.S Law Enforcement on its way to track down and

prosecute the cybercriminals behind these campaigns.

12943

In this post I'll provide yet another data mined collection of personally identifiable [2]high-

profile cybercriminal XMPP/Jabber and email addresses with the idea to assist U.S Law Enforce-

ment and the security industry on its way to track down and prosecute

the cybercriminals

behind these communities.

Here’s a currently active XMPP/Jabber including email addresses list of high-profile cyber-

criminals part of my currently ongoing Law Enforcement and OSINT operation called "Uncle

George":

17.2.6 Exposing a Currently Active Portfolio of Emails Belonging to Iran-Based Lone

Hackers and Iran-Based Hacking Teams and Groups - An OSINT Analysis

(2021-02-16 13:45)

[1]

13601

Dear blog readers,

I wanted to take the time and effort and publicly share a currently active obtained using Tech-

nical Collection list of currently active email address accounts belonging to Iran-based lone

hackers and Iran-based hacking groups and teams with the idea to assist U.S Law Enforcement

including the security industry on its way to track down and prosecute the cybercriminals be-

hind these campaigns including a currently active portfolio of personal Web sites belonging to

Iran-based lone hackers and Iran-based hacking groups and teams. Keep reading!

Currently active portfolio of emails belonging to Iran-based lone hackers and Iran-based hack-

ing groups and hacking teams:

17.2.7 Profiling a Currently Active High-Profile Cybercriminals Portfolio of

Ransomware-Themed Extortion Email Addresses - Part Two (2021-02-16 13:49)

[1]

13678

Continuing the "[2]Profiling a Currently Active High-Profile Cybercriminals Portfolio of

Ransomware-Themed Extortion Email Addresses" series including the original "[3]Exposing Pro-

tonmail and Tutanota's Illicit Abuse by Ransomware Gangs - A Compilation of Currently Active

Ransomware-Themed Email Addresses" post I've decided to issue a second update to the origi-

nal data set of currently active and circulating ransomware-themed emails currently circulating

in the wild with the idea to assist U.S Law Enforcement and the security industry on its way to

track down and prosecute the cybercriminals behind these campaigns.

Currently active portfolio of currently active ransomware-themed email addresses currently

in use:

17.2.8 Exposing Anonymous International's Hacking Collective Online Infrastructure

- An OSINT Analysis (2021-02-18 13:25)

Dear blog readers,

It's been a while since I've last posted a quality update and I've decided to elaborate more and

offer an in-depth analysis of Anonymous International's Hacking Collective online infrastructure

with the idea to assist U.S Law Enforcement and the security industry on its way to properly

track down and attempt to shut down the infrastructure behind their fraudulent and rogue

online infrastructure.

In this post I'll provide actionable intelligence on Anonymous International's Hacking Collec-

tive online infrastructure and discuss in-depth the tactics techniques and procedures of the

cybercriminals behind it and offer an in-depth peek inside Anonymous Indonesia a.k.a SoraCy-

berTeam.

[redacted]

[redacted] от 2010 г. [redacted]

ЕПИКРИЗА

На Данчо [redacted] Данчев, на 27 години

[redacted]

[redacted]

Повод за настоящата хоспитализация: Постъпва за пръв път в психиатричен стационар и до настоящия момент не е ползва специализирана психиатрична помощ. Доведен с Преписка на РУ на МВР - Троян.

По данни от родителите промяната в поведението датира от началото на месец юли, когато заминал да живее сам на квартира в София. През първия месец поддържал ежедневна връзка с тях по телефона, но след това спрял да се обажда. На позвънявания от тяхна страна не отговарял или изключвал телефоните си. Това ги притеснило и те започнали да го издирват активно. Получили писмо от хазаина, че до 15.09.10г. трябва да освободят квартирата, а така също и няколко обаждания за неплатени лизингови вноски за закупен от сина им лаптоп. На посочената дата те отишли в София, където намерили сина си да спи в квартирата. Отказвал да говори с тях, бил груб и хладен. Събрали му багажа за да се върнат в Троян, той ги оставил пред квартирата под предлог, че е зает и заминал някъде с такси. След завръщането в Троян отказвал да контактува с родителите и с други познати. Затварял се по цял в стаята си, отказвал да се храни заедно с тях. Напускал дома си без да дава обяснения къде ходи и кога ще се върне. Промяната в поведението му била констатирана и от съседи и приятели на семейството, които Данчо подминавал като напълно непознати. При отправени забележки от страна на Майката „започвал да ягледа лошо". Навсякъде ходел с преносимия компютър. Гледал телевизия от около метър разстояние, заключвал и по няколко пъти проверявал входната врата дали е заключена. Непосредствено преди намесата на полицията започнал да говори несвързано, смесвал спомени от детството с наскоро случили се неща, употребявал много компютърни термини до степен на неразбираемост.

17.2.14 Dancho Danchev's Disappearance - 2010 - Official Complaint Against Repub-

lic of Bulgaria - Part Two (2021-02-28 08:02)

Dear blog readers,

This is a quick note on my current situation in my home town in Troyan Bulgaria where I was

originally kidnapped and home molested by three police offers from the local police department

who stole my ID from my place and with no witnesses escorted my and locked me in a room in

another town for a period of several months and injected me on a daily basis without anyone's

knowledge and with no legal action and legal consequences from anyone including anyone

from Republic of Bulgaria.

Bulgarian name of people involved in my kidnapping and illegal arrest including robbery 5

years later that used to act as local police inspectors in Troyan Police, Bulgaria circa 2010:

13863

• Марин Моев Маринов

• Павлин Стоянов Георгиев

• Красимир Михов Колев

• Тихомир Найденов Славков\

• Стефан Иванов Милев

• Анатоли Пламенов Трифонов

• Станимир Цочев Инковски

• Иван Недялков Иванов

• Мирослав Стойков Михайлов

• Васил Моев Гачевски

• Божидар Банков Петров

• Веско Цветанов Минков

• Момчил Стефанов Цочев

• Минко Стоянов Минков

• Георги Митков Илиев

Sample personal photo of my personal kidnapper circa 2010 from my place in Troyan, Bulgaria

17.2.15 Dancho Danchev's Law Enforcement and OSINT Operation "Uncle George" -

An Update (2021-02-28 18:34)

[1]

Dear blog readers,

I wanted to take the time and effort and elaborate more on some of the current activities

behind my currently ongoing [2]Law Enforcement and OSINT Operation "Uncle George" where

I've managed to process and actively crawl approximately 1M of publicly accessible cybercrime

forum community web sites for the purpose of enriching and actually distributing the Data Set

to interested parties with the idea to assist U.S Law Enforcement and the U.S Intelligence

Community on its way to properly respond to track down and prosecute the cybercriminals

behind these campaigns.

The current state of Law Enforcement and OSINT Operation "Uncle George" is that I've been

approached by several vendors including independent researchers who expressed interest in

obtaining access to the Data Set for the purpose of data mining and enriching it.

I've also decided to share some recently produced graphs which basically represent a decent

portion of popular keywords and topics that cybercriminals are busy discussing on the commu-

nities found in the original Law Enforcement and OSINT operation "Uncle George" cybercrime

forum Data Set.

17.3.2 Exposing the Guccifer 2.0 "GRU-Connected" Enterprise - An OSINT Analysis

(2021-03-03 13:06)

[1]

13883

Dear blog readers,

I wanted to take the time and effort and elaborate more on the so called Guccifer 2.0 enter-

prise which basically represent a single lone hacker who basically made a high-profile Web site

compromise and actually launched a social media account behind it for the purpose of com-

municating the purpose of attacking and actually making the information publicly accessible

online for free.

In this post I'll provide actionable intelligence on the Guccifer 2.0 enterprise which basically

represent a single lone hacker that actually distributed a high-profile data leak and build a

social media account behind it.

Sample Personal URLs: https://guccifer2.wordpress.com; https://twitter.com/GUCCIFER _2

Sample personal email: Guccifer20@aol.fr

Sample IPs known to have been involved in the campaign: 95.13.15.34; 95.130.9.198;

212.117.164.35; 95.211.168.139

Sample VPN service provider which was used by the Guccifer 2.0 enterprise:

hxxp://ns1.vpn-service.us - 176.9.89.229 - Email: sec.service@mail.ru

hxxp://ns2.vpn-service.us - 85.17.139.9

13884

hxxp://ns3.vpn-service.us - 212.117.164.35

hxxp://ns1.vpn-service.us - 212.32.234.134

hxxp://ns2.vpn-service.us - 37.48.92.139

hxxp://ns3.vpn-service.us - 193.161.87.105

Sample screenshots of conversation with the Guccifer 2.0 enterprise:

Hi - we're running a story on the BBC World Service this weekend which touches on your recent release of alleged Clinton Foundation documents. Would you be available to comment?

6 Oct 2016

hi

u can send me ur questions here

6 Oct 2016

[5]

13887

What do you think about Putin?

18 Oct 2016

i don't live in russia. i'm not interested in russia and its government.

18 Oct 2016

Not even a little bit?

But you don't live in the USA either - and you are very interested in American politics

I mean, I'm interested in Russia (and the UK and the US too)

18 Oct 2016

i'm little bit angry with that. all of u attribute me to russia, but i'm tired of it. i don't care about that country.

18 Oct 2016

[6]

13888

GUCCIFER 2.0
@GUCCIFER_2
Hey! I'm a reporter at VICE Motherboard. Can we chat?
21 Jun 2016
ok! let's try
21 Jun 2016
Yes, we can try here, unless you have OTR/Jabber or Skype.
21 Jun 2016
So, first of all, what can you tell me about yourself? Who are you?
21 Jun 2016
i'm a hacker, manager, philosopher, women lover. I also like Gucci! I bring the light to people. I'm a freedom fighter! So u can choose what u like!
21 Jun 2016
And where are you from?
21 Jun 2016
from Romania
21 Jun 2016

[7]

17.3.3 Exposing FBI's Most Wanted Cybercriminals - "JabberZeuS" Crew - An OSINT

Analysis (2021-03-03 16:07)

[1]

Dear blog readers,

Continuing the "[2]Exposing FBI's Most Wanted Cybercriminals" series I've decided to share

some actionable intelligence on the JabberZeuS crew that used to maintain several large bot-

nets in the context of utilizing the popular DIY and leaked ubiquitous botnet generating and C

&C server control malicious software known as ZeuS.

In this post I'll provide actionable intelligence on the JabberZeuS gang and actually offer an

in-depth peek inside their infrastructure with the idea to assist U.S Law Enforcement and the

U.S Intelligence Community on its way to track down and prosecute the cybercriminals behind

these campaigns.

17.3.7 Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email Ad-

dresses - Part Seven (2021-03-09 12:25)

[1]

14237

Dear blog readers,

Continuing the "Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email Ad-

dresses" blog post series I've decided to share yet another batch of currently active high-profile

cybercriminal email addresses for the purpose of assisting U.S Law Enforcement and the U.S

Intelligence Community on its way to properly track down and prosecute the cybercriminals

behind these campaigns.

Sample personal emails known to have participated in the campaign:

fm _molar@yahoo.com

cvv _king@yahoo.com

17.3.8 Exposing the Modern Money Mule Recruitment Ecosystem - An In-Depth OS-

INT Analysis (2021-03-10 13:35)

[1]

14287

Dear blog readers,

I wanted to take the time and effort and present one of the most comprehensive and publicly

accessible portfolio of currently active money mule recruitment domains for the purpose of

assisting U.S Law Enforcement and the U.S Intelligence Community on its way to track down

and prosecute the cybercriminals behind these campaigns.

In this post I'll provide actionable intelligence on what appears to be one of the most com-

prehensive and extensive publicly accessible portfolio of money mule recruitment domains

associated email addresses and their responding IPs including related pharmaceutical scam

domains that were active at the time.

Sample domains known to have been actively involved in money mule recruitment scams:

[redacted]

[redacted] от 2010 г. [redacted]

ЕПИКРИЗА

На Данчо [redacted] **Данчев, на 27 години**

[redacted]

[redacted]

Повод за настоящата хоспитализация: Постъпва за пръв път в психиатричен стационар и до настоящия момент не е ползва специализирана психиатрична помощ. Доведен с Преписка на РУ на МВР в Троян.

По данни от родителите промяната в поведението датира от началото на месец юли, когато заминал да живее сам на квартира в София. През първия месец поддържал ежедневна връзка с тях по телефона, но след това спрял да се обажда. На позвънявания от тяхна страна не отговарял или изключвал телефоните си. Това ги притеснило и те започнали да го издирват активно. Получили писмо от хазаина, че до 15.09.10г. трябва да освободят квартирата, а така също и няколко обаждания за неплатени лизингови вноски за закупен от сина им лаптоп. На посочената дата те отишли в София, където намерили сина си да спи в квартирата. Отказвал да говори с тях, бил груб и хладен. Събрали му багажа за да се върнат в Троян, той ги оставил пред квартирата под предлог, че е зает и заминал някъде с такси. След завръщането в Троян отказвал да контактува с родителите и с други познати. Затварял се по цял в стаята си, отказвал да се храни заедно с тях. Напускал дома си без да дава обяснения къде ходи и кога ще се върне. Промяната в поведението му била констатирана и от съседи и приятели на семейството, които Данчо подминавал като напълно непознати. При отправени забележки от страна на Майката „започвал да ягледа лошо". Навсякъде ходел с преносимия компютър. Гледал телевизия от около метър разстояние, заключвал и по няколко пъти проверявал входната врата дали е заключена. Непосредствено преди намесата на полицията започнал да говори несвързано, смесвал спомени от детството с наскоро случили се неща, употребявал много компютърни термини до степен на неразбираемост.

17.3.9 Dancho Danchev's Disappearance - 2010 - Official Complaint Against Republic

of Bulgaria - Part Three (2021-03-19 07:47)

[1]

Dear blog readers,

14732

Continuing the "[2]Dancho Danchev's Disappearance - 2010 - Official Complaint Against Re-

public of Bulgaria" series I've decided to post yet another update on my current situation in my

home town Troyan in Bulgaria where I was originally illegally arrested and kidnapped by local

police officers from Troyan Police using a stolen ID from my place with no witnesses and with

force and for holding me hostage for a period of several months with no explanation and no

legal action and injecting me on a daily basis.

Sample personal photo of my second personal kidnapper circa 2010 - Васил Моев Гачевски -

(https://www.facebook.com/profile.php?id=100030506870037):

17.3.10 Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email

Addresses - Part Eight (2021-03-20 12:16)

[1]

14734

Dear blog readers,

Continuing the "[2]Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email

Addresses" blog post series I've decided to share yet another currently active personal email

portfolio of high-profile cybercriminals with the idea to assist U.S Law Enforcement and the

U.S Intelligence Community on its way to track down and prosecute the cybercriminals behind

these campaigns.

Sample personal emails belonging to high-profile cybercriminals that are currently active and

are known to have participated in related cybercrime-friendly campaigns:

17.3.12 Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email

Addresses - Part Nine (2021-03-20 12:53)

Dear blog readers,

I’ve decided to share yet another batch of currently active email address accounts belonging to

high-profile cybercriminals that are currently active part of the "[1]Exposing a Currently Active

Portfolio of High-Profile Cybercriminal Email Addresses" series with the idea to assist U.S Law

Enforcement including the U.S Intelligence Community on its way to track down and prosecute

the cybercriminals behind these campaigns.

Sample personal emails belonging to high-profile cybercriminals that are currently active and

are known to have participated in related fraudulent and malicious campaigns include:

17.3.13 Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email

Addresses - Part Ten (2021-03-20 17:12)

[1]

Dear blog readers,

Continuing the "[2]Exposing a Currently Active Portfolio of High-Profile Cybercriminal Email

Addresses" blog post series I've decided to share yet another batch of currently active high-

profile cybercriminal email address accounts with the idea to assist U.S Law Enforcement and

the U.S Intelligence Community on its way to track down and prosecute the cybercriminals

15003

behind these campaigns.

Sample portfolio of currently active personal email address accounts belonging to high-profile

cybercriminals that are currently active include:

17.3.14 Dancho Danchev's Blog Going Private Today!

Request Access Now!

(2021-03-22 19:21)

Dear blog readers,

This is Dancho. After approximately 12 years of operation and 5.6M page views since Decem-

ber, 2005, I've decided to make my personal blog which is one of the security industry's leading

publications with thousands of unique visitors on a daily basis since December, 2005 private

with the idea to attract a high-quality and vetted invite-only audience of up to 100 readers for

a $100 for one year access to the blog which would greatly allow me to do my research and

continue producing high-quality and never-published before type of research and cybercrime

and OSINT including threat intelligence type of analysis and research articles and reports.

Are you interested in obtaining invite-only access to my personal blog? Can you afford to pay

$100 for one year access to my personal blog? Keep reading.

15057

For the $100 amount I can guarantee daily updates of up to 5 or 6 high-quality blog post articles

discussing never-published or discussed before type of cybercrime research including hardcore

technical research and OSINT and threat intelligence type of research and information in the

following areas and categories:

• Targeted Malware Analysis - An Analysis

• In-the-Wild Malware Analysis - An Analysis

• Targeted Phishing Analysis - An Analysis

• Malicious URL Analysis - An Analysis

• Targeted Mobile Malware Analysis - An Analysis

• APT Coverage - New Campaign

• Fraudulent Infrastructure - An Analysis

• Online Fraud Campaign - An Analysis

• Historical OSINT Campaign - An Analysis

• Russian Business Network coverage

• Koobface Botnet coverage

• Kneber Botnet coverage

• Hundreds of IOCs (Indicators of Compromise)

• Tactics Techniques and Procedures In-Depth Coverage

• Malicious and fraudulent infrastructure mapped and exposed

• Malicious and fraudulent Blackhat SEO coverage

• Malicious spam and phishing campaigns

• Malicious and fraudulent scareware campaigns

• Malicious and fraudulent money mule recruitment scams

• Malicious and fraudulent reshipping mule recruitment scams

• Web based mass attack compromise fraudulent and malicious campaigns

• Malicious and fraudulent client-side exploits serving campaigns

Are you interested in continuing to read and go through my research as you were during the

initial opening of this blog since December, 2005 up to present day? I would need the following

information in order to grant access to my personal blog with the idea to resume posting high-

quality and never-published or discussed before type of research and articles as of today.

• An introduction email to my dancho.danchev@hush.com with a brief introduction including

your name and position and the reason why you’re interested in obtaining access to my

personal blog for research purposes in an invite-only fashion

15058

• An upfront payment of $100 to my PayPal ID: dancho.danchev@hush.com which guaran-

tees one year free access to my personal blog an up to 5 or 6 high-quality and never-

published before type of research articles on a daily basis

• A follow up email to my dancho.danchev@hush.com to confirm that you’ve send the pay-

ment and that you’re interested in obtaining access to my personal blog where I’ll use

your email for the purpose of sending you an invitation and offering you access to my

personal blog

Let’s make this happen!

17.3.15 Exposing a Currently Active Stolen Credit Cards E-Shop -

An OSINT Analysis

(2021-03-25 14:07)

[1]

I've recently came across to a currently active cybercrime-friendly online E-shop for stolen

credit cards which basically empowers its customers with the necessary information including

actual stolen and compromised credit cards information for the purpose of allowing them to

obtain access to such type of information and I've decided to offer an exclusive peek inside

the inner workings of the E-Shop with the idea to assist U.S Law Enforcement and the U.S

Intelligence Community on its way to track down and prosecute the cybercriminals behind

these campaigns.

Sample screenshots of the cybercrime-friendly E-shop offering access to stolen and

compromised credit cards information:

[2]

15059

It should be clearly noted that both the public and free instance of Snort offers an in-depth

network-based and sophisticated current and emerging threats type of protection and that the

rule set gets properly updated on a daily basis with relevant signatures for a variety of threats

which should be considered as a must use including Cisco's proprietary Snort rule set which also

gets updated on a periodic basis which also includes that use of Cisco's Threat Grid in terms of

offering real-time protection against current and emerging threats including the geolocation-

based firewall which basically allows a user to only allow access to a specific country's online

assets and to also deny access to the majority of countries internationally potentially mitigating

a possible breach and intrusion scenario where an attacker would attempt to phone back and

actually attempt to access the compromised network which is a where a geolocation based

firewall comes into play properly protecting a network and its infrastructure from possible leaks

and malicious software attempting to phone back including possible IP (Intellectual Property)

leaks which could easily allow a nation-state or a sophisticated online to easily map and attempt

to build a bigger picture in terms of a company or an end user's online activity for the purpose

of establishing the foundation for successful and related type of malicious attack campaigns

launched against a specific network or an end user.

Among the basic principles that should drive an individual or an organization that seeks to

protect itself from modern nation-state or rogue actors type of threats should include the use

of community driven and basically commercially free services and products which also include

the use of Snort including the use of Cisco's global threat intelligence grid for the purpose of

preventing and responding to modern cyber attack outbreaks including currently active and

live threats.

[11]

15067

Yet another highly recommended and extremely relevant in terms of proactive and reactive

protection feature courtesy of Cisco's Firepower ASA appliance is the Botnet Traffic Filter fea-

ture which offers an additional set of botnet traffic mitigation features

which basically protects

a compromised network from possible data leaks and possible attempts for the malicious soft-

ware to actually phone back to a rogue and malicious infrastructure.

[12]

For users interested in protecting their mobile device from possible mass surveillance and

eavesdropping campaigns there are several scenarios which should be considered such as for

instance the use of VPN on a mobile device including actual real-time and email communi-

cation which should be properly encrypted using for instance PGP including modern real-time

communication protections mechanisms such as for instance the use of XMPP/Jabber's OMEMO

15068

real-time encryption feature including the use of stripped and proprietary mobile devices which

greatly mitigate the threat posed by modern mobile malware in the context of using a propri-

etary operating system which often offers an additional layer of security and privacy for the

user.

Recommended "stripped" mobile devices to use potentially preventing widespread surveil-

lance efforts including personal privacy violations:

• [13]"Stripped" mobile device with hardened security and privacy-aware mobile

OS

• [14]"Stripped" mobile device with hardened security and privacy-aware mobile OS 01

• [15]"Stripped" mobile device with hardened security and privacy-aware mobile OS 02

• [16]"Stripped" mobile device with hardened security and privacy-aware mobile OS 03

• [17]"Stripped" mobile device with hardened security and privacy-aware mobile OS 04

• [18]"Stripped" mobile device with hardened security and privacy-aware mobile OS 05

• [19]"Stripped" mobile device with hardened security and privacy-aware mobile OS 06

• [20]"Stripped" mobile device with hardened security and privacy-aware mobile OS 07

• [21]"Stripped" mobile device with hardened security and privacy-aware mobile OS 08

• [22]"Stripped" mobile device with hardened security and privacy-aware mobile OS 09

• [23]"Stripped" mobile device with hardened security and privacy-aware mobile OS 10

The next logical step would be to ensure that the metadata on the device in terms of Web

browsing including possible public and proprietary service use is properly obfuscated. Among

the primary concerns whenever you choose to obfuscate a particular set of data would be

possible supply-chain infiltration on behalf of the U.S Intelligence community in particular pur-

chase orders that would further allow me to collerate and potentially identify a particular end

user based on the actual supply-chain infiltration. One of the primary concerns in today’s

modern Internet world largely dominated by wide-spread surveillance courtesy of the U.S In-

telligence Community including rogue and potentially malicious actors including nation-state

and cybercriminals is the direct exposing of an individual's private network including possible

collerated-based events that could potentially identify and track down a particular individual.

15069

In terms of mobile device obfuscation the end user is largely advised to take advantage of per-

sonal firewall for the purpose of monitoring outgoing and incoming connections on the device

in particularly blocking all-incoming connections and closely monitoring outgoing connections.

Furthermore, what an end user can potentially do in terms of hardening their mobile device

is to ensure that it does not leak back any internal IP addresses including possibly the device

MAC address potentially exposing the device user's internal and private network potentially

falling victim to " **[24] ABSOLINE EPILSON**" type of end point and mobile device targeting type

of attacks and campaigns courtesy of the U.S Intelligence Community including other rogue

factors including nation-state actors and cybercriminals in general. How you should proceed

in order to archive this process? Keep reading.

Next to the general use of "stripped" mobile devices end users should also consider the follow-

ing highly recommended tactics techniques and procedures for the

purpose of protecting their

IP (Intellectual Property) including their mobile device and end point device's confidentiality

availability and integrity:

• **WebCRT -** Among the most common privacy-exposing scenarios in terms of " **[25] ABSO-**

LINE EPILSON" remains the active utilization of unsecure browsing habits namely a mis-

configured browser in terms or browser extension including the newly introduced "local IP

exposing" WebCRT feature found in a variety of browsers. What should end users better

do to protect their local IP including adding additional privacy and security features to

their browser? Keep reading. The first thing a user should ensure from a network-based

perspective is that their browser fingerprint remains as private as possible including the

inability of the U.S Intelligence Community.

• **Personal Host Based Firewall** - the first thing to look for in a personal firewall is a bi-

directional firewall functionality allowing you to block all incoming traffic and successfully

allowing you to allow all ongoing traffic based on a variety of rules including possible

white-listing. The next logical step would be to implement basic ARP-spoofing prevention

solution for the purpose of ensuring that your ISP including VPN provider cannot perform

basic ARP-spoofing attack campaigns which could compromise the confidentiality of the

targeted host and expose to it a multitude of network-based attack deception attack cam-

paigns.

15070

[26]

• **HIPS-based firewall -** a decent and highly recommended solution to protect end points

from malicious software including web-based client-side exploits who might attempt to

drop malicious software on the affected hosts include the use of host-based intrusion

prevention system which has the potential to stop a wide variety of threats that have the

potential to expose an end point to a multi-tude of malicious software such as for instance

the use of [27]Comodo Firewall which is a highly relevant and recommended solution for

a huge number of end points in terms of offering advanced and sophisticated malware

protection mechanisms.

• **Basic Network Deception -** it should be clearly noted that every network is a subject

to possibly compromise including automated and targeted attacks which could be easily

prevented and actually allow a network operator or a network user to gather the necessary

cyber attack information which could easily offer an in-depth peek inside the activities of

the cyber attacker in particular the type of information that they're interested in obtaining.

15071

Case in point would be the use of a proprietary network-based deception appliance such

as for instance [28]Thinkst Canary including the use of the [29]Nova Network Deception

Appliance which empowers a network operator with a sophisticated network deception

techniques which allows them to trick a cyber attacker into falling victim into a rogue

network-based assets with the actual network operator in a perfect position to gather

intelligence on the real intentions of the cyber attacker while properly protecting their

infrastructure from malicious attackers

[30]

• **Custom-Based DNS-based DNSSEC-based servers with no logs policy** - worry about the

U.S Intelligence Community and your ISP eavesdropping on your traffic and Web brows-

ing history potentially launching man-in-the-middle attacks? Consider utilizing basic free

privacy-conscious DNS service provider with DNSSEC-enabled no-logs policy such as for in-

stance - **[31] DNS Watch** - which you can freely use without worry that your Web browsing

history and DNS request history will be logged and potentially abused. A possible logi-

cal recommendation in the context of improving an end-point's in-depth security strategy

might be the utilization of the so called protective DNS which offers an in-depth protection

techniques and is often available online for free. Case in point is the use of [32]Cisco's

Umbrella solution which offers an in-depth protection mechanism and is available to end

users and organizations online for free.

[33]

Windows-based users should definitely consider using and learning how to use the **[34] Ad-**

vanced Tor Router application which basically offers a diverse set of unique privacy-enhancing

and privacy-preserving featuring while utilizing the Tor Network further ensuring and offering

a free solution for end users interested in preserving their Web browsing activities including

possible network-wide Tor Network adoption on per OS and on per application-based basis.

What does this application has to offer in terms of unique privacy-preserving features? Basi-

cally it offers a variety of unique and never presented or discussed before type of Tor-Network

and end-point privacy-enhancing or preserving features further ensuring that the end user will

remain properly protected from sophisticated network-based and client-based type of attack

campaigns potentially aiming to identify and expose their identity. What's worth emphasizing

on in terms of the application is the unique set of privacy-preserving and oriented client-side

feature in terms of possibly privacy-oriented and secure browsing experience.

Sample Screenshot of the Privacy-Preserving Browser-Based Advanced Tor Router fea-

tures:

15073

[35]

• **Anti-forensics** - it used to be a moment in time when users were primarily concerned with

their browsing habits and use of online resources which is where specific browsers that

don't log anything on the hard drive come into play. A possible solution and recommen-

dation here include the use of the [36]Sphere anti-forensics browser which doesn't log

anything on the hard drive and should be considered as a decent anti-forensics solution

for anyone who's interested.

• **VeraCrypt containers** - a proper full-disk encryption solution should be taken into consid-

eration in case the user wants to protect their information and intellectual property from

15074

physical type of attacks that also includes the use of Virtual Desktops with built-in secu-

rity and privacy mechanisms in place such as for instance the use of [37]Comodo Secure

Desktop

• **Application isolation** - it should be clearly noted that a modern and in-depth defense strat-

egy should include the use of application sandboxing solutions which has the potential to

prevent a huge number of client-side based exploitation attempts including to actually

protect an end user from a variety of Web based client-side exploits serving threats such

as for instance the use of [38]Sandboxie which is a free solution that actually works and

has the potential to prevent a huge number of Web based threats that expose users to a

variety of threats

• **Hardware-Based Isolation** - a proper network based strategy should consist of a basic

hardware-isolation methodology where for instance malicious attackers would have hard

time trying to penetrate and compromise due an additional level of hardware-isolation

applied methodologies and techniques

• **Whitelisting** - although this approach has been widely discussed throughout the years

it should be clearly noted that modern anti-malware solutions should be also providing

a possible application whitelisting feature where users should only whitelist a basic ap-

plication which would allow them to still perform their activities and basically block and

prevent and execution of related applications

Sample tips for the purpose of ensuring a proper and secure installation of end-point security

solutions include:

• always password-protect your end-point software including possibly ensuring that the end-

point security software can self-protect from having it shut down

• always ensure that a manual update is properly taking place compared to automatic up-

dates which leaves a window of opportunity for a possible network traffic colleration in-

cluding possibly rogue and bogus update entering your network

• ensure that you’re not utilizing the cloud-database feature for the purpose of looking

up your Web browsing history including possible host-based application execution which

could lead to a possible data and end-point inventory colleration which basically leaves

you with a properly secured "stripped" security solution that you can use to properly se-

cure your end-point without the risk of having your Web browsing history exposes includ-

ing your end-point application inventory which could lead to possible fingerprinting and

inventory-mapping which could lead to possible targeted attacks

[39]

15075

What would be an appropriate choice for a VPN-provider basically offering the necessary peace

of mind in terms of network-based connectivity with privacy-enabled solutions in mind in terms

of possible no-logs policy including related value-added features further enhancing the neces-

sary privacy-based no-logs policy in today's modern Internet World with widespread surveil-

lance and privacy-violations courtesy of the U.S Intelligence Community and various other

rogue actors including nation-state and cybercriminals in general? Keep reading.

The next logical step would be to stay away from mainstream mobile devices citing potential

Security and Privacy in mind including the use of a properly selected VPN service provider for

the purpose of applying basic traffic obfuscation techniques including end-point network isola-

tion in this particual context the end user and the organization should definitely look forward

to implement a possible VPN provider actually "mixing" public legitimate jurisdiction-aware

infrastructure with privacy-aware public or proprietary network technology - in this particular

case VPN2Tor type of technology.

Mainstream VPN provider as an entry point to a proprietary hardened and privacy-features

15076

tailored network - such as for instance the Tor network - NordVPN is a highly recommended

solution against "ABSOLINE EPILSON" type of end-point colleration-based targeting type

of attacks. What do I have in mind? Basically the off-the-shelf commercial vendor is also

currently capable of offering VPN2Tor type of access which basically offers a variety of privacy-

enhancing features which basically can offer stealth and commercially-relevant solution which

basically combines VPN functionality with access to the Tor Network which basically offers

a high-degree of security and anonymity which can be used to protect against "ABSOLINE

EPILSON" type of attacks in terms of traffic and geographical location deniability including

possibly offering limited data-colleration capabilities on behalf of U.S Intelligence Agencies.

[40]

A proprietary off-the-shelf VPN service provider basically taking you a step higher in pre-

serving your online privacy by introducing and actually providing a unique set of no-logs

jurisdiction-aware type of encryption-protocols and basic traffic-mixing tactics and strategies -

[41]Cryptohippie.

Want to find out more?

Are you interested in a possible evaluation of your organiza-

tion's Security Project or Security Product in terms of a Security Assessment or a possible

OPSEC (Operational Security) based Privacy Features Evaluation? Interested in inviting me to

speak at your event including possible sensitive and classified project involvement?

15078

STRATEGIC COMPETITION IN CYBERSPACE

The United States' strategic competitors are conducting cyber-enabled campaigns to erode U.S. military advantages, threaten our infrastructure, and reduce our economic prosperity. The Department must respond to these activities by exposing, disrupting, and degrading cyber activity threatening U.S. interests, strengthening the cybersecurity and resilience of key potential targets, and working closely with other departments and agencies, as well as with our allies and partners.

First, we must ensure the U.S. military's ability to fight and win wars in any domain, including cyberspace. This is a foundational requirement for U.S. national security and a key to ensuring that we deter aggression, including cyber attacks that constitute a use of force, against the United States, our allies, and our partners. The Department must defend its own networks, systems, and information from malicious cyber activity and be prepared to defend, when directed, those networks and systems operated by non-DoD Defense Critical Infrastructure (DCI)[1] and Defense Industrial Base (DIB)[2] entities. We will defend forward to halt or degrade cyberspace operations targeting the Department, and we will collaborate to strengthen the cybersecurity and resilience of DoD, DCI, and DIB networks and systems.

Second, the Department seeks to preempt, defeat, or deter malicious cyber activity targeting U.S. critical infrastructure that could cause a significant cyber incident regardless of whether that incident would impact DoD's warfighting readiness or capability. Our primary role in this homeland defense mission is to defend forward by leveraging our focus outward to stop threats before they reach their targets. The Department also provides public and private sector partners with indications and warning (I&W) of malicious cyber activity, in coordination with other Federal departments and agencies.

Third, the Department will work with U.S. allies and partners to strengthen cyber capacity, expand combined cyberspace operations, and increase bi-directional information sharing in order to advance our mutual interests.

17.3.17 Sock Puppetry - Exposing Foreign Influence Operations or the Basics of In-

formation Warfare Operations - An Analysis (2021-03-27 11:16)

17.3.18 DoD's Cyber Strategy for 2018 - An Analysis (2021-03-29 07:52)

[1]

Going through the latest [2]DoD Cyber Strategy for 2018 it should be clearly noted that

several key new developments are continuing to take place which are worth discussing in

the broader context of real-time cyber threat intelligence cyber attack

attribution and cyber

attack prevention mechanism which today are taking place primarily courtesy of the U.S DoD

the NSA and the U.S Cyber Command.

In this post I'll discuss a newly emerged trend which is called "forward defense" where U.S based

cyber warriors will actually bother to proactively respond to and prevent current and emerging

cyber attacks by scouting foreign networks including foreign influence and information opera-

tion campaigns that also includes the use of botnets and cyber espionage type of campaigns

to further protect U.S critical infrastructure from current and emerging cyber threats.

While the majority of the cyber threat intelligence work in the U.S is done by the commercial

sector the U.S Cyber Command continues to actively apply basic U.S DoD military methodology

15079

including near real-time information sharing initiatives for the purpose of demonstrating the

key operational capability in the context of targeting the online infrastructure that also includes

to actively respond to information warfare including foreign influence operations.

Key summary points to consider:

• **Information Warfare is making its way into the White House official Cyberspace strat-**

egy document - I've already discussed this unique trend in a related article which you

can check out [3]here - which undoubtedly sets a unique precedent where we have the

White House directly interfering with basic military concepts such as for instance infor-

mation warfare and information operations that also includes the use of foreign influence

operations which further empowers the U.S DoD and the NSA with unique capabilities to

respond to these type of campaigns possibly directly interfering with Russia's information

warfare concepts which believe it or not in another world are directly copied from publicly

accessible U.S DoD and NSA publicly accessible papers throughout the years. In terms

of information warfare operations that also includes foreign influence operations this is a

dangerous game to play which may inevitably lead to actually catching some high-profile

information warfare operations or eventually KGB or Russia's FSB operators which goes far

beyond the usual duties of the U.S Cyber Command the U.S DoD and the NSA in general

which has to do with far more high-profile cyber threats that also includes cyber warfare

campaigns and possible direct threats against U.S critical infrastructure

• **Foreign influence operations** - it still remains unclear as to the extend of this basic miscon-

ception which basically relies on the use of social media or the so called rogue and bogus

content farms which are pretty similar to high-profile and relevant cybercrime-friendly

blackhat SEO (search engine optimization) campaigns in the context of traffic acquisition

and traffic hijacking which basically has nothing to do with Russia's active measures in

Cyberspace which is a dangerous word to play with in particular in the context of having

the U.S Cyber Command the U.S DoD and the NSA hunt down and track down foreign in-

fluence operations. It should be also clearly noted that a direct response should be issues

on a systematic and persistent basis which basically represents the U.S Cyber Command

and the U.S DoD including the NSA's basic principles and mode of operation where the vir-

tual assets of a specific foreign influence operator can either can directly exposed or shut

down or actually a direct DoS (Denial of Service) launched against them which shouldn't

be surprising in the broader context of fighting cybercrime and responding to cyber war-

fare incidents and campaigns online

• **Sock puppetry and foreign influence operations** - yet another dangerous word which

should be used with caution remains the use of "sock puppets" which are basically for-

eign influence operators positioned by the U.S Cyber Command the U.S DoD and the NSA

as a possible National Security risk which should be properly monitored and actions taken

against it in one form or another in particular a direct attempt to expose the operator

behind the rogue and bogus content farm including to actually attempt to launch a DoS

(Denial of Service) attacks against their infrastructure

Stay tuned!

17.3.22 Watch Dancho Danchev's Keynote at CyberCamp 2016 - Exposing Koobface

- The World's Largest Botnet! (2021-03-30 19:50)

Dear blog readers,

I've decided to share a copy of my YouTube Keynote presentation presented at CyberCamp

2016 discussing in-depth my research into the Koobface botnet including the actual details on

how I eventually attempted to monitor and take it offline including the actual [1]PPT. Enjoy!

17.3.25 Cyber Threats Facing U.K's Internet-Connected Infrastructure - An OSINT

Analysis (2021-03-31 08:12)

[1]

15121

In today's modern Internet-connected World hundreds of thousands of users continue joining

the Internet on a first-time basis potentially getting themselves exposed to a multi-tude of

malicious software spam and phishing attacks including active participation in botnets which

basically represent an automatically controlled tens of thousands of Internet-connected hosts

under the supervision of a remotely-based Russian cybercriminal who's making tens of thou-

sands of money on a daily basis by using the access to the Internet-connected hosts potentially

exposing home users and corporate networks to a variety of online-based threats such as for

instance the direct compromise of the confidentiality availability and integrity of the targeted

host and its infrastructure.

With more cybercriminals continue to look for ways to monetize access to malware-infected

hosts by actively launching malware spam and phishing fraud campaigns online more users

continue getting exposed and potentially falling victim into these type of scams with the cy-

bercriminals behind these campaigns successfully compromising home-based and corporate

networks while earning fraudulently obtained or generated revenue from the access to the

malware-infected hosts.

In the following free threat intelligence report we will offer an in-depth actionable intelligence

on modern cyber threats facing U.K's infrastructure with the idea to raise awareness on the

degree of sophistication and persistence on behalf of Russian an international-based cyber-

criminals who seek to obtain access to home and corporate-based networks possibly seeking

financial gain. We will also provide a sample threat data to showcase our modern threat in-

telligence platform in action which works by intercepting and

reponding to modern cyber at-

tack threats which include Client-Side Exploits, Web Site Defacements, Radical Propaganda,

Scareware, Rogueware, Phishing, Spam, Malicious Software, Botnets, Command and Control

Infrastructure, Compromised Web Sites, oney Mule Recruitment facing U.K's infrastructure and

actually notifies the affected party in an automated fashion.

Users who are interested in gaining more insight into their network's susceptibility to modern

15122

cyber attack threats including their home and corporate network including their ISP (Internet

Service Provider) should approach us at - dancho.danchev@hush.com

Sample geolocation graphs of malicious and fraudulent threats facing U.K based

Internet-connected infrastructure:

17.4.2 Recommended High-Profile Psytrance Song of the Day! (2021-04-06 20:51)

Dear blog readers,

This is Dancho. I wanted to take and effort and present a newly launched series of blog posts

called "Psytrance Song of the Day" where I intend to share with you some of the high-profile and

currently circulating psytrance songs with the idea to help you reach out to a new set of music

including to empower you with a new set of music choice for your listening and enrichment

experience.

17.4.3 Dancho Danchev's Blog - Proprietary MISP (Malware Information Sharing Plat-

form) Instance Running - Request Access Today! (2021-04-07 14:11)

Dear blog readers,

This is Dancho. I wanted to let everyone know that I've recently started running a proprietary

MISP (Malware Information Sharing Platform) instance where I distribute and share most of my

proprietary research with a variety of third-parties including connected instances or users who

have API access to my research which is now also available in STIX/TAXII including MISP format

where you or your organization can request API access to my proprietary threat intelligence

feed for research or commercial purposes by approaching me at dancho.danchev@hush.com

Sample categories which I cover in my daily batch of proprietary threat intelligence research

include:

• Targeted Malware Analysis - An Analysis

15181

✖	Dancho Danchev	Dancho Danchev	16	Malicious IP, Malware Campaign, Spam Campaign	16256	ddanchev@cryptogroup.net	2021-04-02	An Analysis - Fraudulent Infrastructure - Daily Batch of Fraudulent IPs - Part Two	All
✖	Dancho Danchev	Dancho Danchev	12	Malicious IP, Malware Campaign, Spam Campaign	1965	ddanchev@cryptogroup.net	2021-04-02	An Analysis - Fraudulent Infrastructure - Daily Batch of Fraudulent IPs	All

17.4.4 Recommended High-Profile Daily Military Technology Video! (2021-04-07 14:17)

Dear blog readers,

Continuing the "[1]Travel Without Moving" blog post series where I used to feature a high-

profile publicly accessible satellite imagery for a variety of high-

profile locations throughout

the years I've decided to share a highly recommended video which is basically a [2]THAAD

demonstration video which you should watch and enjoy in case you're interested in learning

more about modern military technology.

17.4.7 Dancho Danchev's Second Edition of Cybercrime Forum Data Set for 2021 -

Direct Download Available! Request Copy Today! (2021-04-14 03:37)

[1]

15185

Dear blog readers,

This is Dancho and I wanted to let everyone know that I've just released the second edition of

the original "[2]Cybercrime Forum Data Set for 2019" this time including an additional set of

full offline copies of over a dozen of publicly accessible cybercrime-friendly forum communities

with the idea to distribute the Data Set to the academic community including vendors and orga-

nizations and researchers including U.S Law Enforcement and the U.S Intelligence Community

part of my currently ongoing Law Enforcement and OSINT operation "[3]Uncle George".

Users interested in receiving a direct download link (19GB) of the second edition of the

Cybercrime Forum Data Set for 2021 which now includes full offline copies of over 111

publicly accessible cybercrime-friendly forum communities should approach me at dan-

cho.danchev@hush.com and I would be happy to offer a direct download link for you and your

organizations.

Sample cybercrime-friendly forum communities included in the Data Set include:

17.4.13 Exposing the Pay Per Install Underground Business Model – Historical OSINT

- An Analysis - 2008 - Part Two (2021-04-27 10:34)

15211

In my previous [1]analysis on the pay per install underground market business model I

elaborated more on the actual business model using a variety of images which I've collected

over the years to showcase the business model sticking to the usual "an image is worth a

thousand words" methodology.

In this post I've decided to continue the series and offer an additional exclusive peek inside

the cybercrime ecosystem pay per install underground market business model including to

discuss in-depth the tactics techniques and procedures of the cybercriminals behind these

campaigns.

Sample screenshots of various pay per install business franchises throughout the years in

particular circa 2008:

Dear blog readers,

As many of you know I've been officially running a high-profile security and hacking project on

the original [2]Astalavista.box.sk including the launch management and maintenance of one of

the Web’s most popular and high-traffic volume search engine for hackers and security experts

where we’re currently accepting advertisers and offering a pretty good advertising inventory

in terms of traffic while we’re offering a permanent banner and a text link for those who are

interested.

17.4.19 My Response to Ransomware! - An Analysis (2021-04-29 18:00)

[1]

Dear blog readers,

Worry about ransomware and its epidemic growth next to the hype of cryptoviral extortion

which I originally predicted in my "[2]Malware - Future Trends" paper circa 2006? Keep reading.

Part of an ongoing effort on my behalf using Technical Collection and continuing my [3]series

of posts [4]exposing the activities of [5]ransomware gangs I managed to take offline approxi-

mately 3,000 email addresses belonging to ransomware gangs and lone individuals using ran-

somware in direct cooperation with Protonmail and Tutanota's Abuse Departments.

[6]

15246

Stay tuned!

17.4.20 Exposing China's "Thousand Talents Program" - An OSINT Analysis

(2021-04-29 18:42)

China's "[1]Thousand Talents Program" is known to be the country's one of the main sources

for attempting to steal and lure foreign scientists into falling victim into a vast network of sci-

entific research activities for foreign countries which in reality can fall victim to active counter-

intelligence and intellectual and technological "know-how" exchange

and stealing for the pur-

pose of exchanging financial incentives.

In this post I'll discuss in-depth China's "Thousand Talents Program" and provide actionable

intelligence on the actual recruitment practices.

Sample Shanghai Jiao Tong University Application Form:

15248

APPLICATION FORM FOR TITLED PROFESSORSHIP POSITION

17.4.21 Dancho Danchev's Law Enforcement and OSINT Operation "Uncle George" -

An Update - Collected ICQ, Cryptocurrency, XMPP/Jabber, Phone, QQ, Tele-

gram and Viber Accounts (2021-04-29 19:25)

Dear blog readers,

I’ve decided to issue the following update part of my currently ongoing Law Enforcement and

[1]OSINT Operation called "[2]Uncle George" including a special thanks to McAfee and Ilya

Timchenko for taking the time and effort and going through the actual [3]Cybercrime Forum

Data Set for 2019 including the [4]Cybercrime Forum Data Set for 2021 and producing a vari-

ety of interesting results in the context of providing personally identifiable information on the

cybercriminals behind these campaigns.

In this post I’ll provide a recently collected ICQ numbers list part of my currently ongoing Law

Enforcement and OSINT Operation "[5]Uncle George" for the purpose of assisting U.S Law En-

forcement on its way to track down and prosecute the cybercriminals behind these campaigns:

15259

A currently active list of ICQ numbers belonging to high-profile cybercriminals part of my

currently ongoing Law Enforcement and OSINT Operation called "Uncle George":

17.5.1 Five New White Papers for WhoisXML API Released Online! Grab a Copy To-

day! (2021-05-01 05:27)

[1]

15771

Dear blog readers,

This is Dancho and I wanted to let everyone know that I've just released six new white papers

and case studies on the topic of using Maltego in combination with [2]WhoisXML API for the

purpose of mapping and doing reconnaissance of fraudulent and malicious online infrastructure

used by cybercriminals.

Find below the actual copies:

- [3]Profiling a Money Mule Recruitment Registrant Emails Portfolio - An Analysis

- [4]Profiling a Rogue Fast-Flux Botnet Infrastructure That's Currently Hosting Multiple Online

Cybercrime Enterprises - An Analysis

- [5]Profiling the "Jabber ZeuS" Rogue Botnet Enterprise - An Analysis

- [6]Exposing a Fraudulent Boutique and Rogue Cybercrime-Friendly Forum Community - An

Analysis

- [7]Exposing a Rogue Domain Portfolio of Fake News Sites - An Analysis

[8]

Sample Screenshot of a well known money mule recruitment domain registrant

17.5.3 Exposing Iran-based Hackers and Web Site Defacement Group’s Personal

Web Sites Portfolio - Direct Technical Collection Download! Grab a Copy To-

day! - Part Two (2021-05-24 04:02)

[1]

15788

Dear blog readers,

I've recently changed the actual download locations for two of the "Iran-based Hackers and Web

Site Defacement Group's Personal Web Sites Portfolio - Direct Technical Collection Download"

file archives where you can actually go through some of the entire content portfolio on a huge

number of currently active Web sites belonging to Iran-based hacking groups including lone

hackers posted [2]here including [3]here.

Grab a free copy of the original research [4]here including the second part [5]here.

Part 01 - Download [6]here

Part 02 - Download [7]here

Check out the actual document [8]here.

14.	KAMALIAN Behrouz	POB: Tehran DOB: 1983	Head of the IRGC- linked "Ashiyaneh" cyber group. The "Ashiyaneh" Digital Security, founded by Behrouz Kamalian is responsible for an intensive cyber-crackdown both against domestic opponents and reformists and foreign institutions. On 21 June 2009, the internet site of the Revolutionary Guard's Cyber Defence Command posted still images of the faces of people, allegedly taken during post-election demonstrations. Attached was an appeal to Iranians to "identify the rioters".	10.10.2011

17.5.4 Profiling a Currently Active High-Profile Cybercriminals Portfolio of

Ransomware-Themed Extortion Email Addresses - Part Three (2021-05-24 19:29)

[1]

15901

Shipping them while they're hot.

Continuing the "[2]Profiling a Currently Active High-Profile Cybercriminals Portfolio of

Ransomware-Themed Extortion Email Addresses - Part Two" including "[3]Exposing Pro-

tonmail and Tutanota's Illicit Abuse by Ransomware Gangs - A Compilation of Currently Active

Ransomware-Themed Email Addresses" including "[4]Profiling a Currently Active High-Profile

Cybercriminals Portfolio of Ransomware-Themed Extortion Email Addresses" series I've de-

cided to share yet another recently obtained using Technical Collection portfolio of currently

active personal email addresses belonging to currently active lone ransomware users including

ransomware gangs with the idea to assist U.S Law Enforcement on its way to track down and

prosecute the cybercriminals behind these campaigns.

Currently active sample ransomware-themed personal email

addresses known to have partic-

ipated including to be currently participating in active ransomware-themed campaigns:

17.5.5 Sample Conference Presentations - Accepting Conference Event Invitations!

(2021-05-25 21:50)

[1]

Dear blog readers,

This is Dancho. I've decided to share some of my previous conference event presentation

photos with the idea to find out who might be interested in inviting me to speak at their event.

17.5.6 Sample Articles and OSINT Research Publications Full Offline E-Book Compi-

lations Available! Grab a Free Copy Today! (2021-05-25 21:51)

Dear blog readers,

This is Dancho and I've decided to share with everyone some of my

currently active and

recently published full offline E-Book copy of some of my research articles and OSINT

publications throughout the years. Are you interested in downloading a free full offline E-Book

copy of my personal blog in various E-Book reader formats? Are you an Amazon Kindle user?

Grab a full offline E-Book copy of my personal blog from [1]here and feel free to share it with

your friends and colleagues.

Sample research articles and OSINT analysis currently available online for free in multiple

free E-Book versions courtesy of me:

17.6.1 Dancho Danchev's Disappearance - 2010 - Official Complaint Against Republic

of Bulgaria - Part Four (2021-06-09 02:09)

[1]

16046

Dear friends.

I never really had the chance to elaborate or actually explain what really took place with me in

2010 when I was what appears to be illegally arrested using a stolen ID and a molestion and

home robbery attempt courtesy of local police officers from Troyan Police where Troyan is my

home town including a kidnapping attempt where I was taken into a car by the same people -

one of them is the mayor of a village called Debnevo and the other two are running local pizza

businesses and are actually involved with my town's administration as advisers. It appears that

I was then drugged and sedated without my knowledge for a period of 5 years where under a

physical violence pressure I've lost approximately $85,000 due to physical harassment without

no legal action on behalf of my country or any other country involved which leaves me with

home molestation kidnapping attempt and a physical robbery attempt by police officers from

the town of Troyan with no legal action besides a DANS agent visit who asked me to attend a

doctor session and actually advised me to take a pension. The same people that robbed and

kidnapped me and basically ruined my money and well-being are currently still supposed to

be working in the local police department with no legal action on behalf of my country or any

other country involved leaving me with no money and a steady flow of loans which I try to take

care of by working on a part-time or contractor basis.

Sample Facebook profile IDs of the people responsible for my illegal kidnapping illegal arrest

home molestation and the stealing of my personal ID from my place and holding me hostage

for a period of couple of months an injecting me on a daily basis:

https://www.facebook.com/profile.php?id=100030506870037

16047

https://www.facebook.com/profile.php?id=100005932519460

Primary points of contacts in case someone is worried about well-being and whereabouts in

this case should be:

Email: dans@dans.bg

Telefon za korupciq na slujiteli na MVR - 02 / 982 22 22

GDBOP - Signal za korupciq i izpirane na pari - gdbop@mvr.bg

Nachalnik RPU Troyan - rutr.lo@mvr.bg

Troyan Police - Email: police _troyan@abv.bg

Troyan Hospital - Email: mbal _troyan@abv.bg

Lovech Psychiatry Clinic - Email: dpblovech@abv.bg

Troyan Municipality - Email: mail@troyan.bg

16048

و بنفس الطريقة؛ لو كان الملف المخفي ملف نصي نستخدم برنامج المفكّرة (notepad) أو الوورد في فتحه كما في المثال السابق، ونحتاج فقط أن نعرف مكان وجود المفكّرة أو الوورد في الجهاز.

حتى هذه النقطة نكون قد انتهينا من عملية إخفاء الملفات واستخدامها بهذه الطريقة، ولكن بقي علينا شرح كيفية إلغاء الملفات المخفية، وشرح ميزات ومضار هذه الطريقة.

2) حذف الملفات المخفية:

وهنا لدينا حالتان:

– إما أن يكون الملف الذي أخفينا فيه الملف وهمياً وليس ذا أهمية، عندها بمجرد إلغاء الملف الوهمي نكون قد ألغينا الملف المخفي. كما في مثالنا السابق فلو قمنا بإلغاء الملف test1.txt فإننا نكون أيضا قد ألغينا

Dear blog readers,

I've decided to share a recently obtained using Technical Collection portfolio of email addresses

known to have been involved in various cyber jihad campaigns online including to possess a

direct involvement with the GIMF (Global Islamic Media Front) including the Ekhlaas Islamic

Network including the actual registrations of cyber jihad themed domains for the purpose of

assisting U.S Law Enforcement and the U.S Intelligence Community on its way to track down

and monitor the cybercriminals behind these campaigns.

Sample portfolio of currently active email addresses known to have been involved in cyber

jihad campaigns online:

17.6.3 Exposing a Currently Active Portfolio of Cyber Jihad Related Email Addresses

- An OSINT Analysis (2021-06-13 17:53)

16056

Dear blog readers,

This is Dancho and I've decided to share with everyone a currently active list of high-profile

cyber jihad domain and campaign registration email addresses which I obtained using a variety

of means where the ultimate goal would be to assist U.S Law Enforcement and the U.S Intel-

ligence Community on its way to track down and prosecute the cybercriminals behind these

campaigns.

Sample currently active email addresses known to have been

involved in cyber jihad domain

registrations and current and ongoing cyber jihad campaigns include:

17.6.4 Dancho Danchev's Law Enforcement and OSINT Operation "Uncle George" -

Sample Graphics (2021-06-13 18:09)

[1]

Dear blog readers,

This is Dancho and I’ve decided some of the graphs which I produced part of my currently

ongoing Law Enforcement and OSINT Operation called "[2]Uncle George" where the ultimate

goal would be to assist fellow researchers vendors and organizations including U.S Law

Enforcement and the U.S Intelligence Community on its way to track down and prosecute the

cybercriminals behind these campaigns.

ment Groups or Lone Web Site Defacement Groups - An OSINT Analysis

(2021-06-14 23:49)

Dear blog readers,

This is Dancho and I've decided to share what appears to be one of the most comprehensive

and up-to-date and relevant email address portfolio of personal email addresses belonging to

high-profile Web site defacement groups including lone Web site defacement groups with the

idea to assist U.S Law Enforcement and the U.S Intelligence Community on its way to track

down and prosecute the cybercriminals behind these campaigns.

Currently active portfolio of high-profile email address accounts belonging to high-profile

Web site defacement groups including lone Web site defacement groups:

Здравей,
Предлагам ти да смениш системните ти администраторчета от StudioX.
Дължиш ми такса дигитално спокойствие в размер от 25 000 EUR.
Ориентирай се да я платиш на 16ASoz7GTbfYoexS4DM2LpuNohcM6uPEPd
Желая да благодаря на протестантите #ПротестиДоКрай!
Не се предавайте пред милиционерите, шамарете ги като нападат да си знаят!
Те са нисък клас хора и не трябва да се страхувате от тях!
Драги граждани, знаете ли как г-н Иван Стоименов Гешев рекетираше през 2012 Magic Coin, а също така и редица други в тази ниша?
Следете сайта на atera.bg, поне са обективни противно на тази пасмина :).
Посетете линка по-долу, има редица от интересни databази:

I don't think so 10:29 AM
Outgoing call
10:31 AM
Бях достатъчно толерантен към Вас в последно време. Идват избори, знаеш. Не мисля да се занимавам с нагли дребни "бизнесмени".
edited 10:32 AM
Знаеш ли, че има 72 часа от уведомление за да се предаде към потребителите?
10:33 AM
Предполагам не си запознат, защото нямате Data Protection Officer lol
10:33 AM
And you know КЗЛД не е хубава институция, какво ли остава за медийното внимание...
10:34 AM
Съдружника може лично да ми се обади също, да не се мишкосва хахахахах

Емил Кюлев
12RtX2uD5chmuMiAp...
9:31 AM
Cancelled call
9:37 AM
Мисля, че се прекрачват всякакви допустими времеви диапазони.
10:27 AM
Това нещо, което не е изгодно и за двете страни 🤔.
10:27 AM
В момента за мое съжаление струва много по-малко

17.7.1 The Basics of Building an Early Warning System for Anticipating and Re-

searching Cybercrime Trends - An Analysis (2021-07-05 08:46)

17.7.2 My Memoir - Accepting Research Questions! (2021-07-05 11:47)

[1]

16296

Dear blog readers,

I wanted to share with everyone the fact that I've started working on a high-profile personal

memoir which basically encompasses a period of over 20 years in the field of computer and

information security including the infamous Web 2.0 transition including my current career

success and experienced in the world of security blogging cybercrime research and threat

intelligence gathering up to present day.

I also wanted to let you know that there will be a lot of bonus content including never-published

before personal account type of research activity and the true story that took place throughout

the 90's in the world of hacking and computer security where I was a teenage hacker enthu-

siast today's leading expert in the field of security blogging cybercrime research and threat

intelligence gathering.

My request? I'm currently accepting research and interview questions from my blog readers

which I could properly answer and present in the form of book chapters where necessary in

terms of my experience as a teenage hacker enthusiast including my current position as a

leading expert in the field of cybercrime research and threat intelligence gathering.

Here are some sample research questions which you could direct to me for the purpose of

assisting me on my way to write and finish the memoir.

17.7.3 Thanks, But no Thanks! (2021-07-06 21:10)

[1]

Dear blog readers,

Following a series of successful data mining and OSINT enrichment successes in the face of

OSINT and Law Enforcement operation called "Uncle George" including my recent attempt to

take down approximately 3,000 ransomware emails which was quite a

success including the

recent and ongoing publication of various compilations of currently active high-profile cyber-

criminal email addresses and XMPP/Jabber accounts I had the privilege to get several of my

blog posts censored and basically taken offline courtesy of Google which is actually good news

in the face of the basic news that I'm currently sitting have been and will continue to be sitting

16298

on a treasure trove of threat intelligence and cyber attack attribution information on current

and emerging cyber threats including to get actual legal threats from various individuals who

appear to have been busy closing down their Twitter and Facebook accounts including LinkedIn

accounts meaning quite a success for the actual data mining and technical collection process

where the ultimate goal here would be to assist U.S Law Enforcement and the U.S Intelligence

Community on its way to track down and prosecute the cybercriminals.

Who wants to rock the boat with me? Request an invite-only

reader access today! Sharing is caring.

Are you a long-time reader of this blog? Are you basically fascinated by the richness and

the informative content on current and emerging cyber threats? Do you want to get a pri-

vate invite-only reader access to keep me motivated? Sharing is caring. Consider sending an

introduction message to dancho.danchev@hush.com including your current position and moti-

vation for reading this blog how has it helped you including a copy of your CV for the purpose

of getting invite-only private access that would greatly motivate me to produce high-quality

and never published content before in an invite-only fashion.

[6]

Therefore after approximately 12 years of active one-man operation running one of the security

industry's leading security publications which is my personal blog which I originally launched in

December, 2005 when I was working on [7]https://astalavista.com while I was studying in the

Netherlands I've decided that the time has come to find an alternative medium to communicate

the treasure trove of threat intelligence and OSINT information that I'm currently sitting on and

have been sitting on throughout the past decade with the idea to show and present the crown

jewels of my research to basically any sort of vetted and trusted client who's interested in my

research and proven methodology for fighting and disrupting the bad guys in a systematic and

efficient way throughout the past decade.

16301

It’s been a privilege and an honor to serve everyone’s needs for approximately 12 years as

an independent contractor running this blog where I’ve actually had the chance to meet and

actually get to know some of the security industry’s leading companies and actual folks working

within the security industry and it will continue to be a privilege and

an honor to know and work

with them in the future.

Zero Day Vulnerabilities are a Commodity
Bargaining in the Underground Market
Exclussive offer for regular customers! Request a two week DDoS attack and get IE, Firefox and Opera zero day vulnerabilities - only until the end of this month
Ain't that courteousness?!
Intell agencies read classifieds
Naah, let's intercept their communications, erase other requests and have them decrease the price
Those greedy cybercriminals, should we tell them to decrease the price or we could have them in the basement, hell, it's tax payers money we're using to obtain 0days?
Mainstream media catching up
Ensuring that as many people as possible are aware of Microsoft's latest security bulletin, improves the overall state of Internet security, ultimately better serves society, thereby limiting carbon dioxide emissions...
www.stripgenerator.com

[17]

[18]

16310

All Warfare is Based on Deception
At a Pentagon's C4ISR Center
Such dare interference with DoD's cyber assets is unacceptable. Initiate an immediate traceback!
Our NIDS are detecting numerous traffic anomalies at some of our mailsevers.
Done! It's the Chinese.
Beijing, PRC's Cyberint Unit
Outstanding cyber deception! While they concentrate on the mail servers, we'll transmit back the data obtained from the infected hosts.
Which we bought from the Russian to faciliate OSINT through botnets. "Ensure your victory before starting a battle", said Sun Tzu!
Moscow, Botnet masters' meeting
The Chinese are getting smarter Andrei. Last month they bought access to .mil and .gov infected hosts only, and look at this Pentagon puppet show now
It's called "segmenting the attack population" Yuri. Perhaps we should print out new brochures..
www.stripgenerator.com

The Blackberry Espionage Saga
Paris, France
What's with all that Blackberry espionage paranoia?!
Don't know! I doubt spies are intercepting our emails anyway.
At the NSA
Our SIGINT operations are consistently lacking behind our Russian adversaries. We must dominate the French spectrum once again!
The interception will proceed smoothly.
Acknowledged!
At the FSB headquarters..
"..will proceed smoothly."
"..intercepting our emails.."
Nyah, Nyah! Do I tell the French or open a disinformation channel to the U.S through France?
www.stripgenerator.com

[21]

16311

Hi. I'm currently serving as the FBI's Deputy Attache in Sofia. We are in the process of providing a malware analytical tool to Bulgarian computer forensic examiners, providing a speaker at an upcoming security conference in Sofia, and other projects. We work closely with Javor Kolev at the Interior Ministry, who you may already know. With an aim toward exploring possibilities for establishing expert links for addressing cybercrime/security issues in the Balkans, I'm writing to ask whether you are you are based in Bulgaria or you are elsewhere in the world?

Best regards,
Pauline Roberts
Direct: +359 2 937 5241
Mobile: +359 885 161 387

Dancho,

I met recently with Albena Spasova, Executive Director of the International Cyber Investigation Training Academy based in Sofia. They are launching a series of trainings in Bulgaria this year.

I mentioned to her that you are someone with expertise, and she asked for your contact information. I am cc'g both Albena and Javor Kolev on this email, so that you and they can make direct contact.

Best regards,
Pauline

Dear Pauline,

Thank you very much for introducing us to Mr. Danchev.

Dear Mr. Danchev,

I would very much welcome the opportunity of organizing a meeting and introducing each other. I am not sure if you are based in Bulgaria or planning a trip in the recent future we can connect on Skype. My ID is albenaspasova with a base in Belgium.

Looking forward hearing from you,

Kind regards,

Albena

Awesome.

Check this out in terms of my disappearance and possible kidnapping courtesy of Bulgaria's

Law Enforcement in the form of an illegal arrest using a stolen ID from my place and actual

home molestation courtesy of local police officers who basically escorted me and held me in

another town for a period of couple of months.

[22]

[23]

Zdrasti Yavore,

Attachvam ti PPT-to koeto napravih naskoro na mqsto koeto sus sigurno znaesh i si hodil tam poveche puti ot men. Mladi hora => borqt se i si otstoqvat poziicite 🙂 Shte se radvam da komentirash, ideqta e da vidish nivoto na znaniqta i research-a koito pravq.

Vupreki che ytre e weekend, se interesuvah imash li jelanie/vuzmojnost da se vidim da piem po neshto, neoficialno i kakto se kazva vednuj zavinagi da se zapoznaem, i eventualno namerim nachin da rabotim zaedno? Ako ne, on Monday mislq che stava sushto.

Let me know.

Best

Zdrasti Yavore,

Jalko che ne uspehme da se vidim dnes, tui kato vupreki che mi se iskashe da govorim za dosta po profesionalni temi, kato che li az ti uvajavam rabotata poveche otkolkoto ti moqta, i nqma kak da ti namekna za nqkoi points koito me bezpokoqt i vuprosi koito iskah da te pitam. Az go davam profesionalno i straight to the point, nadqvam se i ti i vednuj zavinagi da si produljim po profesionalniq si put i eventualno nqkoi den, ako se naloji da se poluchi neshto productivno ot facta che se imame kato kontakti.

Vuprosi:
- Koga shte moga da si vzema dush na spokoistvie, i kak shte stane tova? 🙂
- Centralna Cooperativna Banka tvurdi (do rabotodatelq mi) che ne "moje da svurje imeto mi sus smetkata" za poluchavane na plashtane ot rabotodatelq mi CBS Interactive, chast ot CBS Corporation, za PRUV put za poslednite 2 godini i polovina. Shte probvam sus trite si imena - DANCHO [redacted] DANCHEV, shte se poluchi li tozi put?

Points:
- Az neznam dali vuobshte poglejdash research-a koito ti prashtam (2 presentations so far, sus permission), no sled tezi "projectori" imam problemi sus sigurnostta si, v smisul takuv poslednoto neshto ot koeto imam nujda e NEDOVERIE za socialno-orientiranata mi rabota na mejdunarodno nivo, koqto nqma nishto obshto sus neshtata koito se sluchvat v rodinata mi - BULGARIA, a ako eventualno nqkoga ima TI si the point of contact for anything BG related!

Priqten weekend, i shte se radvam na otgovorite ti, ili v nai-dobriq sluchai nqkakvo razvitie v pravilnata (pone spored men) posoka.

S uvajenie,
--

Zdrasti Dancho,
Shte minesh li dnes prez GDBOP , kakto se razbrahme za okolo 17:30-18:00 ?

17.7.4 Historical OSINT - An Analysis of the South Korean/U.S DDoS Attacks Circa

2009 (2021-07-09 23:56)

During the last couple of days, I was getting harder to resist not publishing some of literally

moronic commentary on the DDos attacks, thankfully not made

by people I know in person or virtually. From the "we know they did it but we don't have data

to prove it", to the very latest and most disturbing commment

by a U.S intelligence

Why disturbing? Because that's exactly what the person – controversial to the common wisdom

you don't need a team to launch this old school amateur-ish http

request flooder –

Key summary points:

- if such a small botnet with such a noisy and amateur-ish request flooder can shutdown the

U.S FCC for days, I wonder what would have happened to the rest

of the sites in the target list if the size of the botnet and sophistication of DDoS techniques

improved

Let me continue in this line of thought - or they secretly brainwash the Teletubies and infiltirate

he hearts and minds of children across the globe, a future

generation of pro-North Korean youngerts. Or they could secretly become a Russian Business

Network franchise, now try sending an abuse notice to the non-existent

North Korean ISPs. They could,

The Web is abuzz with news reports regarding the ongoing DDoS (distributed denial of service

attack)

The attacks which originally took off in the 4th of July weekend, target 26 Sourth Korean and

American government sites and financial institutions.

The W32.Dozer comes in the form of an email attachment

16320

Upon execution the trojan attempts to download the list of targets from three apparently com-

promised servers based in Germany, the U.S and Austria.

17.7.7 Profiling "Nedasites" - A DDoS Attack Tool Campaign Aiming to Target Iran

Prior to the 2009 Election - An OSINT Analysis (2021-07-12 08:06)

[1]

16321

I've recently stumbled upon a unique DDoS tool which is basically enticing users into down-

loading it and launching DDoS attacks against a pre-defined list of Iran-based government and

various other Iran-based targets which appears to have been originally released during the

2009 election in Iran.

In this post I'll provide actionable intelligence and discuss in-depth the campaign including

the actual tool and provide the actual list of targeted URLs including the actual MD5 for the

malicious DDoS tool and discuss in-depth the actual crowd-sourcing DDoS campaign which was

originally lauched during the 2009 election in Iran.

It appears that back in 2009 a tiny group of folks including companies actually organized an

online spree to help and support Iran's activists and protestors with technologies and access to

free service which basically violates the law and should be considered

a dangerous precendent

in the context of assisting Iran-based activists and protestors. Therefore I've decided to take a

deeper look inside the trend that took place internationally back in the 2009 Iran-based election

and offer practical and relevant technical and actionable intelligence information on the actual

infrastructure behind the campaign including its participants.

Related domains and URLs known to have been involved in the campaign:

Something else that's also worth emphasizing on in terms of the Iran 2009 election is that the

U.K's GCHQ has also been busy attempting to track down protestors including activists and

has been busy working on an election specific and GCHQ owned URL shortening service which

I managed to profile and expose [3]here including the following still active Twitter accounts

and URLs known to have been involved in the GCHQ campaign to monitor and track down Iran

2009 election protesters and activists:

17.7.8 Who’s Behind the Conficker Botnet? - An OSINT Analysis for WhoisXML API

(2021-07-22 18:19)

Dear blog readers,

This is Dancho and I wanted to let everyone know of a series of recently released white papers

and case studies courtesy of me for my employer - [1]WhoisXML API detailing the activities of

numerous fraudulent and malicious online gangs and enterprises.

16325

The fourth white paper entitled "[2]Who’s Behind the Conficker Botnet? - An OSINT Analysis"

we decided to offer in-depth and actionable threat intelligence on infamous Conficker malware

and offer a unique peek inside their domain portfolio based on the vast and in-depth real-time

and historical WHOIS database courtesy of WhoisXML API.

Catch up with some of the previous released white papers and case studies courtesy of me

[3]here.

Stay tuned!

17.7.16 Two Persons on the U.S Secret Service Most Wanted Cybercriminals List

Run a Managed Android Malware Enterprise Including a Black Energy DDoS

Botnet - An OSINT Analysis (2021-07-27 12:07)

[1]

Dear blog readers,

This is Dancho. In this post I'll provide actionable intelligence on two individuals on the U.S

Secret Service's Most Wanted Cybercriminals list in particular - [2]Oleksandr Vitalyevich Iere-

menko including [3]Danil Potekhin for the purpose of assisting U.S

Law Enforcement on its way

to track down and prosecute the individuals behind these campaigns.

In this analysis I'll offer actionable intelligence on the fact that the first individual Oleksandr

Vitalyevich Ieremenko is currently running a profitable managed android malware botnet busi-

ness using the - hxxp://agressivex.com domain for his business and is currently on the U.S

Sanctions List as well.

Sample personally identifiable information for Oleksandr Vitalyevich Ieremenko:

Personal Web Site: hxxp://k0x.ru

ICQ: 123424

Personal Email: uaxakep@gmail.com

Sample personal photos of Oleksandr Vitalyevich Ieremenko including Danil Potekhin:

звони в газпром бро 16:44
они ничего не скажут 16:44
они принимают 16:44

16370

Напиши 16:44

В приложении 16:44

звони в газпром бро 16:44

они ничего не скажут 16:44

они принимают 16:44

отправляет твой банк 16:44

если бы твой отправил дошло бы 16:44

Лан щя позвонб 16:44

Епти ну и геморой 16:44

я не могу без денег отправлять) 16:45

Бан на линии 16:46

Банк 16:46

Ну кароче ничего нового 16:49

До 3х рабочих дней 16:49

бредовый какой то банк 16:49

Вообщем периодически буду писать тогда дошли или нет

До 3х рабочих дней 16:49

бредовый какой то банк 16:49

Вообщем периодически буду писать тогда дошли или нет 16:49

ну отпишусь тогда 16:49

ок 16:49

Ну типа межбанк до 3х и ре ебет их 16:49

он пешком что ли идет? 16:49

) 16:49

Да бред в 2021 16:50

Такое 16:50

ну ладн. будем ждать. отписывай. я могу забыть 16:50

16371

такое 16:50
ну ладн. будем ждать. отписывай. я могу забыть 16:50
работы много 16:50
Ок 17:00
Йлу 17:25
Йоу ну что там? 17:25
Пришло? 17:25
нет 17:26
Йо 18:09
Ну как там 18:09
пока без изменений 18:25
Ок 18:26
Не затеряется перевод? 18:26
Если в течении трез дней прилетит 18:26
Вы там отчетность ведете?) 18:26
По балансу и тд

только я 18:43
Ок, норм 18:43
Посмотри может прилетедо уже 19:47
хорошо 19:50
Глянул 20:03
да 20:03
нету пока 20:03
Понял 20:03
я отпишу если раньше будет 20:03
баланс же видно 20:03
Ок 20:04
Слушай что 20:18
Сейчас встретился с коллегой 20:18
Он тоже на тинькоф отправил 20:18
Говорит нефига не пришло

16372

да это у газпрома так, да у мелких банков поди 20:23

обычно у всех моментально 20:23

Да уж, ну ждем 20:40

April 10

Прив как перевод? 9:49

не пришел еще 9:57

April 11

Ауди привет 15:13

привет 15:13

Есть новости? 15:13

не пришел 15:13

Ок ждем 15:13

Я щяс друга тереблю када утнего дойдет поэтому редко пишу)) 15:13

Тоже тихо пока 15:14

April 12

это первый такой случаи 13:19

поэтому выводы напрашиваются очевидные 13:19

April 12

Тогда ты должен знать как межбанк ходит 13:19

Регламент 13:19

моментально 13:19

как и все 13:19

Что там есть по времени ограничения 13:20

И сроки 13:20

не ничего тм нет 13:20

звони в банк отзывай платеж если ты его отправил, он не дошел 13:20

Мы с тобой догтворились до 14го 13:20

Я не могу отозвать платеж он ушел уже тебе на карту 13:20

если бы он ушел он бы пришел 13:20

Ты подождать не можешь и мирно решить? 13:20

все, сегодня ждем 13:20

17.9 September

17.9.1 Exposing HackPhreak Hacking Group - An OSINT Analysis (2021-09-07 04:25)

HackPhreak is a well known U.S based hacking group throughout the 90's which is known to

have been actively using IRC for the purpose of communicating and recruiting new members

including its own Anti-Pedophile organization among the Internet's first community-driven or-

ganization to fight online child pornography launched by a popular and well-known hacking

group including the following high-profile members of the group:

HackPhreak Group Members Include:

COOL

Stay tuned!

16424

Hi everyone,

I recently came across to the entire portfolio of [2]SANS Threat Intelligence Summit presen-

tations which are currently online at YouTube and I've decided to take the time and effort to

go through them and offer practical and relevant threat intelligence and OSINT advice and

recommendations which I hope will come handy to the presenters including anyone currently

working in the field or interested in making an impact as a threat intelligence analyst.

[3]

Sample presentations from the Summit include:

- [4]Analyzing Chinese Information Operations with Threat Intelligence - this is a pretty infor-

mative presentation that offers practical and relevant Information Operations advice including

16430

a pretty decent case study on the topic of a high-profile information leak campaign based in

China

- [5]Collections and Elections: How The New York Times built an intel collections program in

2020 - this is a pretty informative presentation that offers an in-depth and relevant advice on

building threat intelligence capabilities in terms of building a threat intelligence team including

a first person experience in the process of building a threat intelligence program

- [6]Better Than Binary: Elevating State Sponsored Attribution via Spectrum of State Respon-

sibility - this is a pretty informative presentation that offers a very good overview of various

threat intelligence techniques including collection enrichment and actual technical collection

advice

What the presenters should keep in mind when doing their research and homework is to actually

implement a threat intelligence "rock star" mentality when doing research and actually attempt

to take a step higher in their research and make disruption and

actually take both active and

proactive measures and actions against specific cyber threat actors and adversaries.

I've been recently working on several articles on the topic of threat intelligence and I came up

with a proper article which I'll share in this post with the idea to improve my reader's situational

awareness on the topic eventually improving the way they work and do threat intelligence

gathering online.

——————-

00. The Basics of Threat Intelligence - A Novice Cyber Threat Researcher's Guide

In this article we'll aim to successfully provide an in-depth overview of the Threat Intelligence

Gathering process including various methodologies for processing enriching and dissemination

including active case studies and in-depth overview of various standards and technologies

including an in-depth overview of various Threat Intelligence Gathering tools and techniques.

This article aims to successfully provide readers with general and in-depth overview of the

Threat Intelligence Gathering process including live and relevant examples including in-depth

overview of various Threat Intelligence Gathering tools and techniques.

This article is aiming to target a diverse set of audience including security practitioners in-

formation security professionals threat intelligence analysts and organizations seeking an in-

formative and educational approach further understanding the basics of threat intelligence

including an in-depth overview of various threat intelligence methodologies and practices in-

cluding a variety of in-depth case studies related to threat intelligence gathering including an

in-depth discussion on various methodologies and threat intelligence gathering tools.

Overview of Threat Intelligence

Threat intelligence is a multi-disciplinary approach to collecting processing and disseminat-

ing actionable threat intelligence for the purpose of ensuring that an organizations security

defense is actively aware of threats facing its infrastructure so that an adequate and cost-

effective strategy can be formulated to ensure the confidentiality integrity and availability of

the information. Threat Intelligence is the process of collecting processing and disseminating

actionable intelligence for the purpose of ensuring that an organizations infrastructure remains

properly secured from threats facing its infrastructure. The collection phrase can be best de-

scribed as the process of obtaining processing and analyzing actionable threat intelligence

for the purpose of processing and disseminating the processed data. The collection phrase

consists of actively obtaining real-time threat intelligence data for the purpose of processing

enriching and assessing the data for the purpose of processing and disseminating the data.

The collection phase consists of active monitoring of sources of interest including various public

and privately closed community sources for the purpose of establishing an active threat intelli-

gence gathering program foundation. The collection phrase consists of assessing and selecting

a diverse set of primary and secondary public and privately closed sources for the purpose of

establishing a threat intelligence gathering model. The collection phase consists of assessing

and selecting primary and secondary public and privately closed sources for the purpose of

establishing an active threat intelligence collection model. The collection phase consists of

assessing the primary secondary public and privately closed sources for the purpose of estab-

lishing an active threat intelligence gathering collection model. The collection phase consists

of assessing and selecting the primary and secondary public and privately closed sources for

the purpose of establishing the foundations of the collection phrase.

What analysts should keep in mind when doing threat intelligence collection including the ac-

tual Technical Collection process in terms of obtaining access to actual raw threat intelligence

information which includes domains URLs and MD5's that also includes raw cybercrime forum

information or actual copies of a cybercrime friendly forum community for the purpose of build-

ing a capacity driven threat intelligence program in terms of profiling

and applying basic cyber

attack attribution methodologies is to have a well trained staff force which could easily and

efficiently obtain access to both real-time current and historical threat intelligence information

using proprietary and publicly accessible sources for the purpose of enriching the information

and actually coming up with new and novel research and cyber attack trends analysis.

The processing phrase consists of actively selecting processing tools and methodologies for

the purpose of setting the foundations for a successful processing of the data. The processing

phase consists of actively processing the threat intelligence gathering collected data for the

purpose of establishing the foundations for a successful processing of the data. The processing

phase consists of collecting the processed data for the purpose of establishing the foundations

for a successful processing of the collected data for the purpose of processing and enriching the

processed data. The processing phase consists of active collection enrichment and processing

of the collected data for the purpose of active processing of the collected data. The processing

phase consists of active selection of primary and secondary public and privately closed sources

for the purpose of processing the collected data for the purpose of enriching and processing

the collected data. The processing phase consists of active real-time aggregation of actionable

threat intelligence data for the purpose of establishing the foundations of active processing and

enrichment of the processed data for the purpose of processing and enriching of the processed

data.

What analysts should keep in mind when doing threat intelligence processing is the relevance

and timeliness of the actual information including the quality of the source including public and

proprietary sources where the analysts should keep in mind that a huge portion of the informa-

tion that could properly protect an enterprise or a vendor online is already publicly accessible

and should be properly processed including possibly enriched in terms of coming up with the

big picture in terms of the actual information including to come up with novel and new cyber

attack attribution research. Sticking to major threat intelligence sharing and dissemination

standards should be crucial in terms of feeding the publicly accessible and processed informa-

tion into a threat intelligence processing system that also includes a cyber attack attribution

process for the purpose of coming up with new and novel research including actual cyber attack

attribution research using a researcher's or an organization's own methodology.

The dissemination phase consists of active processing and dissemination of the processed

data for the purpose of communicating the actionable intelligence for the purpose of ensur-

ing that an organizations defense is actively aware of the threats facing its infrastructure and

security defense mechanisms. The dissemination phase consists of active distribution of the

processed and enriched actionable intelligence for the purpose of active dissemination of the

processed and enriched data. The dissemination phase consists of active dissemination and

enrichment of the processed data for the purpose of establishing the foundations of an active

threat intelligence gathering process. The dissemination phase consists of active communica-

tion and distribution of the processed and enriched data for the purpose of communicating the

processed and enriched data across the organizations security defense mechanisms.

What analysts should keep in mind when disseminating threat intelligence is to always reach

out to the proper parties including as many sources of information as possible for the purpose

of presenting their research and information to the security industry industry and the security

community in an in-depth enriched and properly processed way potentially assisting the se-

curity industry and the security community on its way to properly attribute a cyber attack or

detect new cyber attack trends.

Threat Intelligence Methodologies

Numerous threat intelligence methodologies are currently available for an organization to take

advantage of on its way to properly secure its infrastructure taking into consideration a proac-

tive security response. Among the most common data acquisition strategies remains the active

data acquisition through forum and communities monitoring including the active monitoring

of private forums and communities. Carefully selecting and primary and secondary sources

of information is crucial for maintaining the necessary situational awareness to stay ahead

of threat facing the organizations infrastructure including the establishment of an active re-

sponse through an active threat intelligence gathering program. Among the most common

threat intelligence acquisition methodologies remains the active data acquisition through pri-

mary and secondary forums and communities including the data acquisition through private

and secondary community based type of acquisition platforms.

Among the most common threat intelligence data acquisition strategies remains the active

team collaboration in terms of data acquisition data processing and data dissemination for

the purpose of establishing an active organizations security response proactively responding

to the threats facing an organizations infrastructure. Among the most common data acquisi-

tion strategies in terms of threat intelligence gathering methodologies remains the active en-

richment of the sources of information to include a variety of primary and secondary sources

including private and community based primary and secondary sources.

Proactive Threat Intelligence Methodologies

Anticipating the emerging threat landscape greatly ensures an organizations successful im-

plementation of a proactive security type of defense ensuring that an organizations security

defense remains properly protected from the threats facing its infrastructure. Properly under-

standing the threat landscape greatly ensures that a proactive response can be properly imple-

mented for the purpose of ensuring that an organizations security defense remains properly

protected from the threats facing its infrastructure. Taking into consideration the data obtained

through an active threat intelligence gathering program greatly ensures that a proactive secu-

rity response can be adequately implemented to ensure that an organizations security defense

remains properly protected from the threats facing its infrastructure.

Among the most common threat acquisition tactics remains the active understanding of the

threats facing an organizations security infrastructure to ensure that an adequate response can

be properly implemented ensuring that an organizations defense remains properly protected

from the threats facing its infrastructure. Among the most common threat intelligence gather-

ing methodologies remains the active team collaboration to ensure that an active enrichment

process can be properly implemented further ensuring that an organizations defense can be

properly protected from the threats facing its infrastructure. Based on the information acquired

through an active threat intelligence gathering acquisition processing and dissemination pro-

gram further ensuring that an organizations infrastructure can be properly protected from the

threats facing its infrastructure.

The Future of Threat Intelligence

The future of threat intelligence gathering largely relies on a successful set of threat intelli-

gence gathering methodologies active data acquisition processing and dissemination strate-

gies including the active enrichment of the processed data for the purpose of ensuring that

an organizations security defense remains properly in place. The future of threat intelligence

largely relies on the successful understanding of multiple threat vectors for the purpose of es-

tablishing an organizations security defense. Relying on a multi-tude of enrichment processes

including the active establishment of an active threat intelligence gathering acquisition pro-

cessing and dissemination program greatly ensures that a proactive team-oriented approach

can be implemented to ensure that an organizations security defense remains properly pro-

tected from the threats facing its infrastructure.

———————-

including the following second article which I've been working on in terms of using OSINT in

combination with threat intelligence to do a better research online and actually come up with

novel and never-published research and cyber threat actor research and analysis:

---

00. Basics of OSINT in the Context of Fighting Cybercrime - The Definite Beginner's Guide

"*What use are they? They've got over 40,000 people over there reading newspapers.* " - Presi-

dent Nixon

This introductory guide into the world of OSINT is part of an upcoming series of articles aiming to

assist both novice and experienced security practitioners including analysts for the purpose of

entering the world of OSINT for cybercrime research and aims to offer a high-profile and never-

published before practical and relevant in today's nation-state and rogue cyber adversaries

Internet and cybercrime ecosystem whose purpose general overview and introductory material

and training course material for novice beginners including advanced Internet users hackers

security consultants analysts including researchers who are interested in exploring the world

of OSINT (Open Source Intelligence) for the purpose of making a difference doing their work in

a better and more efficient way including to actually be fully capable and equipped to catch

the bad guys online including to monitor and track them down to the

point of building the big

picture of their fraudulent and rogue online activities. The course including the actual learning

and training material is courtesy of Dancho Danchev who is considered one of the most popular

security bloggers threat intelligence analysts and cybercrime researchers internationally and

within the security industry.

The primary purpose behind this guide is to summarize Dancho Danchev's over a decade of

active passive and active including actionable threat intelligence and OSINT research type of

experience including cybercrime research type of experience where the ultimate goal would

be to empower the student or the organization taking this course into better doing their online

research work including to be fully capable of tracking down and monitoring the rogue and

malicious online activities of the bad guys online where the ultimate goal would be to better

position and enhance your cyber attack or malicious threat actor cyber campaign attribution

skills ultimately improving your work activities and actually empowering you to learn how to

do OSINT for good and most importantly to track down and monitor the bad guys.

16434

Introduction

In a world dominated by sophisticated cybercrime gangs and nation-state sponsored and toler-

ated rogue cyber actors the use of OSINT (Open Source Intelligence) is crucial for building the

big picture in the context of fighting cybercrime internationally including to actually "connect

the dots" in the context of providing personally identifiable information to a closed-group and

invite-only LE community including international Intelligence Agencies on their way to track

down and prosecute the cybercriminals behind these campaigns.

In this training and learning material Dancho Danchev one of the security industry's most

popular and high-value security blogger and cybercrime researcher will offer an in-depth peek

inside the world of OSINT in the context of fighting cybercrime and will provide practical advice

examples and case in particular on how he tracked down and shut down the infamous Koobface

botnet and continued to supply never-published and released before potentially sensitive and

classified information on new cyber threat actors which he continued to publish at his Dancho

Danchev's blog.

Basics of OSINT

OSINT in the context of fighting cybercrime can be best described as the systematic and persis-

tent use of public information for the purpose of building a cyber threat intelligence enriched

data sets and intelligence databases both for real-time situational awareness and historical

OSINT preservation purposes which also include to actually "connect the dots" in cybercrime

gang and rogue cyber actor campaigns and cyber attack type of campaigns. A general ex-

ample would consist of obtaining a single malicious software sample and using it on a public

sandbox to further map the infrastructure of the cybercriminal behind it potentially exposing

the big picture behind the campaign and connecting the dots behind their infrastructure which

would lead to a multi-tude and variety of personally identifiable information getting exposed

which could help build a proprietary cybercrime gang activity database and actually assist LE

in tracking down the prosecuting the cybercriminals behind these campaigns.

" *There's no such thing as new cyber threat actors. It's just new players adopting economic*

and marketing concepts to steal money and cause havoc online. "

The primary idea here is to locate free and public online repositories of malicious software and

to actually obtain a sample which will be later on used in a public sandbox for the purpose of

mapping the Internet-connected infrastructure of the cybercrime gang in question including to

actually elabore more on the ways they attempt to monetize the access to the compromised

host including possibly ways in which they make money including to actually find out what

exactly are they trying to compromise. Possible examples here include VirusTotal or actually

running a malware interception honeypot such as for instance a spam trap which would allow

you to intercept currently circulating in the wild malare campaigns that propagate using email

and actually analyze them in terms of connecting the dots exposing their Internet-connected in-
